

The internet provides an open free platform of information sharing and gives us the ability to investigate current events through our own means without the filtered choosing of the mainstream media or anyone trying to convince people of thinking in a certain direction. The internet is one of humanities greatest achievements and has bridged the gap between countries and allows anyone that has access to it, the ability to communicate with anyone across the world in an instant, this is so very beneficial to humanity at this point in our lives, with corruption in our governments, extremist activism, and a decaying planet, now more than ever we need the tool of a free internet to more easily disperse information in various forms in hopes of making knowledge more accessible and less dictated.

I rely on the Internet as a public platform for free speech, equal opportunity, economic growth and innovation. Without vital Net Neutrality protections, companies like Verizon and Comcast, which have a commercial incentive to limit the free-flowing Web, can decide whether I will have a voice online. These companies should not have the power to determine my fate on the Internet.

The FCC must have the power to protect consumer access to the most important communications medium of our time. The FCC must stand with me and keep the Internet in the hands of the people who use it every day. Please reclassify broadband as a "telecommunications service" and keep the Internet open and free of corporate gatekeepers.
