

The internet provides me with a broad range of information and opinion and allows me to distribute my own point of view. It is the only remaining source/media which is not under corporate control and spewing a biased, limited view of some sort. This includes all the broadcast and print media. There needs to be a media without any censor except myself. That is the internet.

The FCC must have the power to protect consumer access to the most important communications medium of our time. The FCC must stand with me and keep the Internet in the hands of the people who use it every day. Please reclassify broadband as a "telecommunications service" and keep the Internet open and free of corporate gatekeepers.

Recall that the airways are public and the FCC must protect the populace from corporate stranglehold.
