

Appendix C: Verizon Mobile Broadband

What is Mobile Broadband?

[Close](#) X

Mobile Broadband service from Verizon Wireless lets you browse the Internet, download files and access email from your notebook.

Our growing high-speed network covers more than 90% of the U.S. population - more than 280 million people in 264 major metropolitan areas and 268 primary airports in the U.S. - so you can stay connected even when you're on the go.

Benefits

- **Speed.** Typical download speeds of 600 Kbps to 1.4 Mbps and typical upload speeds of 500 to 800 Kbps.*
- **Security.** Code-division multiple access (CDMA) technology and support for most virtual private network (VPN) solutions.
- **Simplicity.** Internet access without phone jacks or separate Internet service providers (ISPs).

Products

- USB Modems
