

As the Constitution states:

Amendment 1 - Freedom of Religion, Press, Expression. Ratified 12/15/1791 "CONGRESS SHALL MAKE NO LAW respecting an establishment of religion, or prohibiting the free exercise thereof; or ABRIDGING THE FREEDOM OF SPEECH, OR OF THE PRESS; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances."

I rely on the Internet as a public platform for free speech, equal opportunity, economic growth and innovation. I further understand companies such as Verizon and Comcast are attempting to defile our rights which is not only outrageous but also ILLEGAL. In my and the opinion of almost everyone I am familiar with, this entire issue of censorship is a distraction to the American people and completely bogus. Perhaps these nefarious companies in which our current political administration is most heavily invested in should leave the United States instead? I believe China may be better suited for them, their beliefs and their intentions. They DO NOT have the right to decide whether I or any other American can have a voice online. I have that right already and not only is it guaranteed but it is unalienable; CANNOT BE REMOVED, TRANSFERRED OR SOLD. The whole of the Bill of Rights is a declaration of the right of the people at large and or as individuals. It establishes rights of !

the individual as unalienable and which consequently, no majority (or internet provider) has a right to deprive them of. Therefore, these companies DO NOT have the power to determine my fate on the Internet as my UNALIENABLE rights are paramount and should be protected under law if you were following same. The time has come for the protection of the people and our rights! DO YOUR JOB AS A PUBLIC SERVANT! YOU WORK FOR US! NEVER FORGET THAT!

The FCC must have the power to protect consumer access to the most important communications medium of our time. The FCC must stand with me and keep the Internet in the hands of the people who use it every day. Please reclassify broadband as a "telecommunications service" and keep the Internet open and free of corporate gatekeepers.
