RE: MB Docket No. 10-56

Dear Chairman Genachowski:

I write to you to tell you a story of an exemplary member of the Bucks County business community – Comcast. The company employs over 10,000 people in Pennsylvania, delivers broadband services that enable local entrepreneurs to expand into new markets and reach far flung customers, and grows the Bucks County economy through its support of local hiring and procurement practices. .

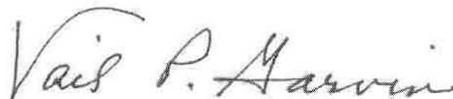

Every year, Comcast is at the center of a great deal of activity within the Central Bucks Chamber of Commerce. With over 2,000 members and growing, the chamber is second largest in the area after the Greater Philadelphia Chamber of Commerce. Chamber membership is driven by strong alliances between business and culture, profit and non-profit, established and emerging businesses.

Just as its products connects Buck County residents to the things that matter most in their lives, Comcast has played a pivotal role in connecting Bucks County to its businesses and leaders. Comcast has sponsored several legislative debates, forums and roundtable sessions. The company features the work of the Chamber several times a year on its Comcast Newsmakers program. Over the years, Comcast has become more involved with Bucks Fever events, taking a leadership role in the Bucks County business community.

I have no doubt that Comcast's proposed joint venture with NBC is a fantastic opportunity to deliver new options and services, in our area and in communities across America. As you review the proposed Comcast/NBC joint venture, please count Bucks County as one example of how Comcast is committed to local economies.

Thank you for your consideration.

Sincerely,

Dr. Vail P. Garvin, FACHE  
Executive Director
