

Dear FCC, wait . . .

Dear Sir or Madam (as there must be a real person reading this somewhere one would hope),

I am most displeased to see an article stating that Google and Verizon would want to make the internet a tiered system. The reason we can all access information equally is that ALL bits flow at the same rate. Why would you want ALLOW them to yank that ability to compromise YOUR future AND OUR Children's future? Haven't you read enough Science Fiction to realize that a controlled information data base leads to corruption?

Look at what The Bush Era has done! Economic ruin! Terrorist's whims listened to. Freedom of the airwaves/print media of the past is now OWNED and controlled! No more "Equal time" for rebuttals; our "American Way" is faded and failing!

Do NOT allow this reported alliance to become reality or you will be a part of a new Dark Age.!

Yes the below words are not mine, but I do agree with them. Please take note of them.

"We Google users demand that you NOT get into bed with Verizon, or any other corporation. Do not sign on to this deal and sell out our freedom to choose on the Internet.

Your founding motto is 'Don't Be Evil.' This deal is evil. It undermines the open Internet upon which hundreds of millions of people rely."

These words too are not mine but I DO agree with them:

"It doesn't make a difference how we get online; we expect that connection to be free of corporate gatekeepers. We demand that you kill this deal and save the Internet. I rely on the Internet as a public platform for free speech, equal opportunity, economic growth and innovation. Without vital Net Neutrality protections, companies like Verizon and Comcast, which have a commercial incentive to limit the free-flowing Web, can decide whether I will have a voice online. These companies should not have the power to determine my fate on the Internet."

Once again I employ you to become mature and do the RIGHT thing. Quash this deal and any more similar to it. REstore the types of rules and regulations that the Bush era destroyed; bring accountability back to The American Way. Do that and our world might recover economically a decade or more sooner than the path we are currently on. Destroy Rupert's Empire, bring equal time back too.

Thank you for listening,

Sincerely,
John Myers

The FCC can't cut private deals that would hand control over the Internet to a few massive phone and cable companies. Any compromise that allows Internet providers to build toll lanes online is not real Net Neutrality.

The agency must stand with the public and protect consumer access to the most important communications medium of our time. The FCC must regain its resolve to protect Net Neutrality on wired and wireless networks. Please reclassify broadband as a "telecommunications service" and keep the Internet open and free of corporate gatekeepers.
