

Please do not allow an oligopoly to rule the internet. Net Neutrality is critical to maintaining free speech and in keeping the web an incubator and equal opportunity platform for innovative economic growth. Allowing private companies such as Verizon and Comcast to set the agenda, rules for internet traffic will be designed to serve only the corporate interest ... only corporate profitability. The interest of the general public will not be a factor in future rules and regulations. Based on our recent experience, corporations cannot police themselves to seek what is in the best interests of their customers, only what enhances their bottom line and personal wealth.

Please reclassify broadband as a telecommunications service. Protect the consumer's access to the most innovative communications medium ever developed. Please do not allow these oligopolistic service providers to control the Internet by building online toll lanes. This is not Net Neutrality.
