RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

I am pleased to write of my support for Comcast's partnership with NBC Universal. As Utah's Lieutenant Governor, I have observed Comcast's positive impact on Utah. The company is a valued service provider, a contributor to the local economy, and a community partner.

Comcast is a well known and respected company in Utah. They employ nearly 1,100 of our people. They have made a significant contribution to our economy and tax revenues. The company's business savvy and employee-friendly practices make a positive difference in the state.

Comcast has been a concerned community partner as well. In addition to investing in the state's broadband network and continuing to improve cable service, the company is highly involved in community service efforts. At Comcast's annual employee service day, Comcast Cares Day, volunteers come together to improve the facilities at ten Title 1, low-income elementary schools across the state. I was honored to recently participate in recognizing students receiving scholarships from Comcast.

Comcast is a great Utah company. I appreciate the service they provide to their customers and to the citizens of the State of Utah. I am supportive of their continued involvement in our community and speedy approval of the Comcast-NBC Universal transaction.

Respectfully,

A handwritten signature in black ink, appearing to read "Greg Bell".

Greg Bell
Lieutenant Governor
State of Utah
