

Dear FCC Engineers,

My name is Frank Thrash . I'm writing to support the comments filed by the Maritime Radio Historical Society (MRHS) regarding WRC-12.

Specifically, I agree with the MRHS position that the FCC should not support those portions of the recommendations for WRC-12 that would adversely effect MRHS station KSM and other stations in the maritime service."

In addition, the possibly exists however remote or not so remote, that a Terrorist Attack or bombing could render the internet, satellite, and digital communications inoperable..

In this past July, International Business Daily published a report from the DOD and US Air Force, that a country such as IRAN could easily lauunch a pulse bomb from satellite that would send this country back to the 1800's in technology..

However, vintage equipment using A! operation could still communicate..normally.

I think in leiu of this possibility, A1 & NBDP Marine frequencies, should be kept open..

Thanking you so very much for your consideration.
