

How many times must the American consumer be lied to and manipulated through coercive unethical practices by corporate power mongers before YOU, "the ambassadors" of just and fair public practices, actually will do your intended function as a true representative of the rights and will of the people? How many Enrons, Bechtels, Halliburtons, Health Souths, BPs, AIGs, Goldman Sacs, Union Carbides, Comcasts, Countrywides...etc. will it take before you finally step up and truly represent the interests and wishes of your community? Or are you forever going to be the complacent lapdogs of corporate corruption simply to brighten your own private financial future at the expense of sacrificing your civic responsibility of ethical treatment of your fellow citizens? I urge you to be leaders in this instance as it is imperative that the final bastion of open and unbiased access to information not be allowed to be auctioned to the highest bidder.

The FCC can't cut private deals that would hand control over the Internet to a few massive phone and cable companies. Any compromise that allows Internet providers to build toll lanes online is not real Net Neutrality.

The agency must stand with the public and protect consumer access to the most important communications medium of our time. The FCC must regain its resolve to protect Net Neutrality on wired and wireless networks. Please reclassify broadband as a "telecommunications service" and keep the Internet open and free of corporate gatekeepers.
