

Jane Welford

2128 Woolsey Street

Berkeley, CA 94705

My name is Jane Welford. I live in Berkeley, CA and my 92 year old mother lives next door to me. Recently "Smartmeters" were installed in all the houses on our street.

My mother's arms began shaking uncontrollably on and off since the installation of these new meters. Her memory has not been great, and has deteriorated more since the installation of the meters.

I am very concerned about all the wireless contraptions we have around us. I know in Europe, cell phone towers are forbidden on schools, hospitals, fire stations and other places that could impact the development of children, of people with illnesses and with the mental acuity of workers for the public health and safety.

Please use the Precautionary Principle and put a halt on these "SmartMeters" at least until we know the ramifications of the combination of all these forces in our cities.

Thank you,

Jane Welford
