

It is open so I can talk what I feel and say what I want and somebody actually hears me. It makes me have a voice. Something they have been in control of for a long time. If this happens then our Government would openly admit to violating the first ammenment. What is difference between many men and one man in 1776 named King Geroge III. It would be a dictatorship that I would rename the Imperial Un-United States of America. Your furthest decenandents in the future will look upon you and will resent you and what you have done. You would be called the greencoats or the modern redcoats. Do you even know how many people responded to the very same comments on msn's main web site? Everyone thought it was very stupid and wrong. It wasn't just my opinion Then well just have 2 internets then. One that Lies and one thats illegal. Watch what happens then. I'm done with standing by and watching you destroy everything I had been raised to believe in. So you mean to tell me that everything in school was a lie? That I memorized the Pledge of Alliengance for people who never cared nor followed what it means. Are these people even American anymore even though!

they were born here? Everyone who doesn't believe that information should be free deserves to be exported out of the country, jailed, or fined. You think this will control it? You are going to make the American public's "mail Bag" overflow and explode going postal. The internet is our Last true Freedom. If you wont stop this for me then do it for you and you childern and your greatest grandchildren 2000 years from now. Not all of the internet is bad. Punish those that do the internet wrong, not those that use it everyday. The Armed forces also use this internet for their own personal use. I hope that instead of thinking of money that you take your contributions from the lobbists tell them them thanks for the money but I'm doing the right thing anyways. Thank you for your time.

The FCC can't cut private deals that would hand control over the Internet to a few massive phone and cable companies. Any compromise that allows Internet providers to build toll lanes online is not real Net Neutrality.

The agency must stand with the public and protect consumer access to the most important communications medium of our time. The FCC must regain its resolve to protect Net Neutrality on wired and wireless networks. Please reclassify broadband as a "telecommunications service" and keep the Internet open and free of corporate gatekeepers. If you try and stop this more and more people will find a way around it. You would be doing what they do in China with the internet and you would have to shut off America to the world to really stop it. So you block stuff here and the other countries will mirror it around back to us. Google really regulates everything. So then we create a new medium that is free. The worldwide opinion of the Un-United States would drop soo low I do not think we would recover. And what about E-bay? You would control that too? E-Bay is economic stimulation! GPL forever. You would be taking your own Identy away from the world. I was born here I feel like fleeing !

to a county that shares my beliefs and that believes in its peoples rights.
