

I believe that Net Neutrality is equal to free speech. To stifle, throttle, or even control the greatest medium we have for communication, would be paramount to censorship. The free flow of ideas in a truly public forum such as the Internet will keep Fascism at bay. To date, the present model of the Internet has not bankrupt anyone (to my knowledge) and has only promoted innovation, advancement and communication throughout the whole world. Do not let us, The United States of America, who prospered on the principle of Freedom, be the next to fall apart over greed.
