

To Whom It May Concern:

I am an American who would like nothing more than to have our First Amendment rights protected. I find that the Internet has been an excellent way for people to start businesses, get work done, and communicate with family. I fear that if net neutrality is not preserved, then the barriers of entry to use the internet will skyrocket and the internet will become censored. All in all, I feel that if corporate entities are allowed to censor the internet, this great technology will silence small voices in a society where it is hard enough for one person to make a large impact. Please preserve net neutrality.

Thank you for your time,  
Duncan Schulze
