

The merger of Comcast and NBC/Universal is an unprecedented merger of content and delivery. This action will cause great harm to other content providers and the public at large. Media in the U.S. is already controlled by only a handful of multi-national companies. This merger would continue this dangerous trend. Americans are best served when there is diversity in the gathering and disseminating of information. This merger will cause the layoff of thousands of workers in a time when jobs are already scarce. Comcast's union busting tactics at ATT show how anti worker this company has become. This merger will only benefit a few stock holders at the expense of the citizen's right to a diversity of information sources. Do not approve this merger.

Thank you for your time.

Todd R. VonOhlen
