

I am a deaf-blind American. I have concerns on the Cell Phones need to access for me and other millions of deaf-blind persons. Hearing people already access earlier than me because the Cell Phone is not access due to the fact Braille, TTY, Tactile buttons, bigger screens, inclusion of screen readers magnification programs at no additional cost.

I would like to have the cellular capabilities for TTY calls.

If no cell phone accessibility is out there, deaf-blind individuals and I may become lack of quality of lives and mental situation.

I urge you to take an opportunity to pass the Cell Phone Accessibility Section 255.
