

I think it is great that we get the chance to be heard!

I think it is very important that all users, blind, partially sighted, deaf blind or any other disability get the chance to access all basic functions of cell phones, making and receiving calls, contacts, calendar text messages, missed received and dialed calls and very importantly, full access to all menus, settings, and help documentation!

choice is crucial, and the ability to live independently is very important.

Thanks for the ability to comment!

May we all work together, toward equal access for all.
