## I. INTRODUCTION

Sprint Nextel Corporation (“Sprint Nextel”) submits this Verified Filing in accordance with the Federal Communications Commission’s (“Commission”) *Report and Order* issued March 17, 2005,<sup>1</sup> and Section 54.209 of its Rules (47 C.F.R. § 54.209).

## II. BACKGROUND

Sprint Corporation was designated as an eligible telecommunications carrier (“ETC”) by the Commission for portions of Alabama, Florida, Georgia, New York, North Carolina, Tennessee, and Virginia by an order dated November 18, 2004 (“Sprint Nextel Designation Order”).<sup>2</sup> The areas for which Sprint Corporation is designated as an ETC are referred to as Sprint Nextel’s “Designated Areas.”

In August of 2005, Sprint Corporation, which provided wireless service using CDMA technology, merged with Nextel Communications, which provided wireless service using iDEN technology. In June 2006, Sprint Nextel acquired Nextel Partners, Inc., an iDEN provider that has been separately designated as an ETC by the Commission.<sup>3</sup> As a result of these mergers, Sprint Nextel now provides service over two networks, using two technology platforms. For lines served pursuant to the *NPCR Designation Order*, a separate Verified Filing is being made with regard to those operations.

---

<sup>1</sup> *In the Matter of Federal-State Joint Board on Universal Service*, 20 FCC 6371 (2005) (“*March 17 Order*”).

<sup>2</sup> *In the Matter of Federal-State Joint Board on Universal Service, Sprint Corporation Application for Designation as an Eligible Telecommunications Carrier*, 19 FCC Rcd 22663 (2004).

<sup>3</sup> *In the Matter of Federal-State Joint Board on Universal Service, NPCR, Inc. d/b/a Nextel Partners, Petition for Designation as an Eligible Telecommunications Carrier*, 19 FCC Rcd 16530 (2004), corrected by Erratum (Sept. 13, 2004) (“*NPCR Designation Order*”).

In 2005, the Commission issued the *March 17 Order* in which it adopted new ETC designation standards and annual reporting requirements as set forth in Sections 54.202 and 54.209 of its Rules. Beginning with the 2007 annual filing, an ETC must only provide the information called for in Commission Rule 54.209, as the information in Rule 54.202 was required to be filed in 2006 on a one-time basis. Sprint Nextel thus addresses below each of the filing requirements in Commission Rule 54.209. Much of the requested information is included in Attachments to this Verified Filing, a number of which have been filed under seal with a Request for Confidential Treatment.

**III. SPRINT NEXTEL'S ANNUAL REPORTING IN ACCORDANCE WITH SECTION 54.209(a)**

Commission Rule 54.209(a) requires a common carrier previously designated by the Commission as an ETC to file certain additional information annually. Sprint Nextel respectfully submits the following information in satisfaction of the Commission's annual reporting requirement.

**A. Sprint Nextel's Service Improvement Plan Progress Reports**

FCC Rule 54.209(a)(1) requires an ETC to provide:

A progress report on its five-year service quality improvement plan, including maps detailing its progress towards meeting its plan targets, an explanation of how much universal service support was received and how it was used to improve signal quality, coverage, or capacity, and an explanation regarding any network improvement targets that have not been fulfilled. The information shall be submitted at the wire center level.

47 C.F.R. § 54.209(a)(1).

Pursuant to Section 54.209(a)(1) of the Commission's Rules, Sprint Nextel submits its Service Improvement Plan Progress Reports that describe with specificity how much universal service support was received and how it was used to improve signal quality, coverage, or capacity, and an explanation regarding any network improvement targets that have not been

fulfilled. This information is submitted at the wire center level. The Company's Service Improvement Plan Progress Report for 2009 for jurisdictions in which it has been designated as an ETC by the Commission, and information relating to its Service Improvement Plans for 2010-2012 are described in **Confidential Appendices 1 through 3 to Exhibit 1. Confidential Appendix 1 to Exhibit 1** includes the amount of universal service funding received in 2009, and details the improvements made in the areas of signal quality, coverage and capacity with those funds.

**Confidential Appendix 2 to Exhibit 1** contains revised projections regarding anticipated support and how that support will be used for the years 2010-2012.<sup>4</sup> These revisions for 2010-2012 demonstrate how signal quality, coverage or capacity will continue to improve due to the Company's receipt of federal high-cost universal service support; the projected start date and completion date for each improvement, and the estimated amount of investment for each project that is funded by high-cost support; the specific geographic areas where the improvements will be made; and the estimated population that will be served as a result of the improvements. These revisions to Sprint Nextel's Service Improvement Plans are based on the Company's evaluation

---

<sup>4</sup> Pursuant to an order released in WT Docket No. 08-94 (*Sprint Nextel Corporation and Clearwire Corporation*, 23 FCC Rcd 17570, 17612 (paras. 107-8) (2008)), Sprint Nextel is obliged to phase out its pursuit of federal universal service high cost support over a five-year period unless specifically supported by an actual cost analysis or unless the Commission adopts a different transition mechanism or a successor mechanism to the current equal support rule. Sprint Nextel is providing projections only through 2012 because its high-cost USF support is scheduled to fall to zero by 2013 (*see In the Matter of High Cost Universal Service Support; Federal-State Joint Board on Universal Service; Request for Review of Decision of Universal Service Administrator by Corr Wireless Communications, LLC, Order and Notice of Proposed Rulemaking* released September 3, 2010 (FCC 10-155), para. 16). The 2010 forecasted receipts are based on annualized year-to-date 2010 figures. The 2011 and 2012 projections do not reflect possible relinquishments of Sprint Nextel's ETC designations in various states.

of many factors, such as current consumer demand, competitive forces, and available capital. As these factors change, the Service Improvement Plans may be modified. In addition, the order in which these facilities are to be constructed has not been finally determined and will be revised over time, and forces beyond the Company's control (for example, zoning issues related to cell site placement) may result in modifications to planned projects or timelines. As a result, the content and timing of the projects in the revised Service Improvement Plans are subject to change.

**Confidential Appendix 3 to Exhibit 1** contains maps that show signal coverage in the Designated Areas following network improvements in 2009, and projected network improvements for 2010-2012.

**B. Sprint Nextel's Network Outages In Designated Areas**

Rule 54.209(a)(2) requires an ETC to make an annual filing of outages within its Designated Areas. The Rule requires reports of:

detailed information on any outage, as that term is defined in 47 C.F.R. § 4.5, of at least 30 minutes in duration for each service area in which an eligible telecommunications carrier is designated for any facilities it owns, operates, leases, or otherwise utilizes that potentially affect (a) at least ten percent of the end users served in a designated service area; or (b) a 911 special facility, as defined in 47 C.F.R. § 4.5(e). Specifically, the eligible telecommunications carrier's annual report must include information detailing: (a) the date and time of onset of the outage; (b) a brief description of the outage and its resolution; (c) the particular services affected; (d) the geographic areas affected by the outage; (e) steps taken to prevent a similar situation in the future; and (f) the number of customers affected.

Rule 54.209(a)(2) does not establish the time period to be covered by a report of network outages. Sprint Nextel has adopted July 1 through June 30 as an appropriate time period for

purposes of meeting an October 1 deadline. **Confidential Exhibit 2** contains the information called for under 47 C.F.R. § 54.209(a)(2).<sup>5</sup>

**C. Sprint Nextel’s Unfulfilled Requests For Service**

Rule 54.209(a)(3) requires an ETC to make an annual report of the number of requests for service from potential customers within the ETC’s designated service areas that were unfulfilled during the past year. The filing must also detail how it attempted to provide service to those potential customers as set forth in Commission Rule 54.202(a)(1)(i). Rule 54.209(a)(3) does not establish the time period to be covered by a report of unfulfilled requests for service. Sprint Nextel has adopted July 1 through June 30 as an appropriate time period for purposes of meeting an October 1 deadline. Sprint Nextel has no unfulfilled requests for service to report for this time period.

**D. Sprint Nextel’s Complaints Per 1,000 Handsets Or Lines**

Commission Rule 54.209(a)(4) requires an ETC to annually report the number of complaints per 1,000 handsets or lines. Rule 54.209(a)(4) does not establish the time period to be covered by a report of complaints received. Sprint Nextel has adopted July 1 through June 30 as an appropriate time period for purposes of meeting an October 1 deadline. **Exhibit 3**

---

<sup>5</sup> Rule 54.209(a)(2) does not define what “designated service area” is for the purpose of determining whether an outage potentially affects 10% of the subscribers in a “designated service area.” Sprint used the total number of lines filed with USAC for each State designated area. Because of the mobile nature of its service, the Company cannot know for certain how many of its subscribers are affected (or potentially affected) by a multi-site outage, and so has estimated this by multiplying the number of sites that were out of service by the number of total subscribers served by high-use sites in the designated area.

identifies the number of complaints per 1,000 handsets that Sprint Nextel received from the Commission, a state commission, a state Attorney General, or a Better Business Bureau.<sup>6</sup>

**E. Sprint Nextel's Certification Regarding Applicable Service Quality Standards And Consumer Protection Rules**

Commission Rule 54.209(a)(5) requires an ETC to certify that it is complying with applicable service quality standards and consumer protection rules. Sprint Nextel certifies that it has complied and will continue to comply with the principles set forth therein.

**F. Sprint Nextel's Certification Regarding Its Ability to Function in Emergency Situations**

Commission Rule 54.209(a)(6) requires an ETC to certify that it is able to function in emergency situations in accordance with 47 C.F.R. § 54.202(a)(2). Sprint Nextel certifies that it is able and will continue to be able to function in emergency situations in accordance with 47 C.F.R. § 54.202(a)(2).

**G. Sprint Nextel's Certification Regarding Its Provision Of A Comparable Local Usage Plan**

Rule 54.209(a)(7) requires an ETC to certify that it has a local usage plan comparable to the incumbent LEC in the relative service areas. Sprint Nextel certifies that it offers and will continue to offer at least one comparable local usage plan as required by Section 54.209(a)(7).

**H. Sprint Nextel's Certification Regarding The Commission's Ability To Provide Equal Access**

Sprint Nextel hereby certifies that the Commission, pursuant to 47 U.S.C. § 332(c)(8), may require it to provide equal access to long distance carriers in the event that no other ETC is providing equal access within one of its Designated Areas.

---

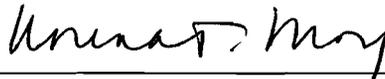

<sup>6</sup> The complaint ratios included in the instant filing reflect total complaints received and total handsets in the state.

**IV. CONCLUSION**

Sprint Nextel appreciates the opportunity to provide this information to the Commission, and will continue to provide high-quality universal services to consumers in its Designated Areas during the 2010 calendar year.

Respectfully submitted,

SPRINT NEXTEL CORPORATION

Confidential Appendix 3 - Sprint Nextel’s Progress Report Service Improvement Plan Maps

## **I. INTRODUCTION**

Sprint Nextel Corporation (“Sprint Nextel” or “the Company”) submits the following Service Improvement Plan Progress Reports pursuant to Section 54.209(a)(1) of the Federal Communications Commission’s (“Commission”) Rules. Sprint Nextel was designated as an eligible telecommunications carrier (“ETC”) for certain service areas within the States of Alabama, Florida, Georgia, New York, North Carolina, Tennessee, and Virginia (the “Designated Areas”) by Commission Order dated November 18, 2004.<sup>1</sup>

## **II. PROGRESS REPORT FOR 2009**

**Confidential Appendices 1(A) through 1(G)** contain a progress report for 2009. Pursuant to Section 54.202(a)(1) of the Commission’s Rules, the Service Improvement Plan Progress Reports describe with specificity how much universal service support was received and how it was used to improve signal quality, coverage, or capacity, and an explanation regarding any network improvement targets that have not been fulfilled. This information is submitted at the wire center level.

## **III. PROJECTIONS FOR 2010-2012**

**Confidential Appendices 2(A) through 2(G)** contain Sprint Nextel’s Service Improvement Plans for the years 2010-2012.<sup>2</sup> These revisions identify the anticipated support

---

<sup>1</sup> *In the Matter of Federal-State Joint Board on Universal Service, Sprint Corporation Application for Designation as an Eligible Telecommunications Carrier*, 19 FCC Rcd 22663 (2004).

<sup>2</sup> Pursuant to an order released in WT Docket No. 08-94 (*Sprint Nextel Corporation and Clearwire Corporation*, 23 FCC Rcd 17570, 17612 (paras. 107-8) (2008)), Sprint Nextel is obliged to phase out its pursuit of federal universal service high cost support over a five-year period unless specifically supported by an actual cost analysis or unless the Commission adopts a different transition mechanism or a successor mechanism to the current equal support rule. Sprint Nextel is providing projections only through 2012 because its high-cost USF support is

*Footnote continued on next page*

and describe how that support will be used. The 2010-2012 projections describe the types of facilities or improvements, locations, estimated population covered,<sup>3</sup> projected budget and estimated deployment schedule for each of these projects. They demonstrate how signal quality, coverage or capacity will be maintained and improved due to the Company's receipt of federal high-cost universal service support; the forecasted start date and completion date for each project; the estimated expenditures associated with each high-cost project; the specific geographic areas where the improvements will be made; and the estimated population that will be served as a result of the projects.

#### **IV. MAPS**

**Confidential Appendices 3(A) through 3(G)** contain maps that show signal coverage in the Designated Areas following network improvements in 2009, and projected network improvements for 2010.

#### **V. PROJECTED HIGH-COST SUPPORT**

Pursuant to Section 254(e) of the Act, a carrier eligible to receive federal high-cost universal service support shall use such support "only for the provision, maintenance, and upgrading of facilities and services for which the support is intended." Consistent with Section 254(e) and Sections 54.313 and 54.314 of the Commission's Rules, Sprint Nextel hereby

---

scheduled to fall to zero by 2013 (*see In the Matter of High Cost Universal Service Support; Federal-State Joint Board on Universal Service; Request for Review of Decision of Universal Service Administrator by Corr Wireless Communications, LLC, Order and Notice of Proposed Rulemaking* released September 3, 2010 (FCC 10-155), para. 16). The 2010 forecasted receipts are based on annualized year-to-date 2010 figures. The 2011 and 2012 projections do not reflect possible relinquishments of Sprint Nextel's ETC designations in various states.

<sup>3</sup> FCC Rule 54.202(a)(1)(ii) does not identify how a company determines the population affected by a network improvement. Sprint Nextel has identified the total population within each wire center.

certifies that all federal high-cost universal service support received will be used only for the provision, maintenance, and upgrading of facilities and services for which support is intended. (Certification attached.)

Based on the most recent per-line support projections of the Universal Service Administrative Company (“USAC”), Sprint Nextel currently estimates that it will receive federal high-cost universal service support for the provision of universal service within the Company’s Designated Areas as follows for 2010:

STATE	PROJECTED ANNUAL HIGH COST SUPPORT
Alabama	\$911,019
Florida	\$3,217,070
Georgia	\$719,846
New York	\$431,535
North Carolina	\$523,999
Tennessee	\$42,924
Virginia	\$2,042,390

The actual amount of universal service support received by the Company for any given year may vary from this estimate as universal service funding levels and subscribership change over time, and as the cap on high-cost support provided to competitive ETCs is implemented.<sup>4</sup>

---

<sup>4</sup> *In the Matter of High-Cost Universal Service Support*, WC Docket No. 05-337, and *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Order released May 1, 2008 (FCC 08-122).

## **VI. NETWORK IMPROVEMENTS AND UPGRADES**

Sprint Nextel's Service Improvement Plans for 2010-2012 consist of projects that will improve, upgrade and maintain the Company's network within its Designated Areas. Sprint Nextel will use federal high-cost universal service support to assist it in implementing these improvements.

Sprint Nextel's Service Improvement Plans identify new cell sites that are projected to be built and operated during the time period covered by the plans. Construction is scheduled to occur during 2010, with operating expenses associated with 2006-2010 sites being reflected for periods after those sites are brought on-air. The projected cost of new sites plus the projected operating expenses associated with sites in Sprint Nextel's Designated Areas substantially exceed anticipated high-cost USF support.

Sprint Nextel's Service Improvement Plans do not include network improvements that will affect every wire center in its Designated Areas. This is not because the Company has decided that no improvements are necessary in those areas, but instead is due to the fact that all projected universal service support has been accounted for and allocated to the network improvements that have been identified. Other network improvements are beyond the scope of these Service Improvement Plans.

The selection of the identified projects is based on the Company's evaluation of many factors, such as current consumer demand, competitive forces, and available capital. As these factors change, the Service Improvement Plans may be modified. In addition, the order in which these facilities are to be constructed has not been finally determined and will be revised over time, and forces beyond the Company's control (for example, zoning issues related to cell site placement) may result in modifications to planned projects or timelines. As a result, the content and timing of the projects in the Service Improvement Plans are subject to change.

Because Sprint Nextel operates on an 18-month capital planning cycle for new site construction, it may decide to amend its Service Improvement Plans to substitute some new construction projects in 2011 through 2012. The Company will identify and report on any such amendments in subsequent filings.

**VII. ANNUAL PROGRESS REPORT**

As required by the Commission, Sprint Nextel will file, on or before October 1, 2011, a progress report on its Service Improvement Plans. As noted above, the Company's identification of projects in the Service Improvement Plans has been based on the information available to it today, and is subject to change over time for many reasons. Projected expenses are estimates, and actual expenses may vary from these estimates. Sprint Nextel's October 1, 2011 progress report will reflect amendments, modifications, and adjustments that occur between now and that time.
