

For the past 16 months I have been subject to electronic surveillance using microwave to enter my apartment and my person, with a speaker and music audible only to myself running 24/7, practicing telehealth delivery, oscillating laser/magnetic field technology, brain-computer imagery, and biomedical and synthetic telepathy. Each day I have told them to stop, as I never authorized this, nor would I ever agree to becoming a human subject. They are using hurt/hate means to accomplish their tasks, done primarily by national security agencies, i.e., Homeland Security, CIA, Circle of Life, Swedish Defence Ministries, with the research element done by local universities. The programming is holistic, medical and surveillance in nature.

As I understand it, the telephone line is what keeps them going on an ongoing basis, although they get into the home using microwave and/or cable. I know they also use electricity to power themselves. My telephone no. is 714 994-8622. I would appreciate it if you could check the line to see what, if anything can be done. I read an article where moving to the "other side of a mountain" is about the only way to combat this. I would appreciate anything you can do. I have been without a front tooth for 18 days because they are experimenting with computer-brain imagery and synthetic telepathy to replace the tooth. Note: I did check with my cable carrier during the first month they went audible (June 2009), but they never responded.
