Assignee/Transferee Certification Statements

1)	The Assignee/Transferee certifies either that (1) the authorization(s) will not be assigned or that control of the license(s) will not be transferred until the consent of the Federal Communications Commission has been given, or (2) prior Commission consent is not required because the transaction is subject to streamlined notification procedures for <i>pro forma</i> assignments and transfers by telecommunications carriers. See Section 1.948(c)(1) of the Commission's Rules.
2)	The Assignee/Transferee waives any claim to the use of any particular frequency or of the electromagnetic spectrum as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise, and requests an authorization in accordance with this application.
3)	The Assignee/Transferee certifies that grant of this application would not cause the Assignee or Transferee to be in violation of any pertinent cross-ownership or attribution rules.* *If the Assignee/Transferee has sought a waiver of any such rule in connection with this application, it may make this certification subject to the outcome of the waiver request.
4)	The Assignee/Transferee agrees to assume all obligations and abide by all conditions imposed on the Assignor/Transferor under the subject authorization(s), unless the Federal Communications Commission pursuant to a request made herein otherwise allows, except for liability for any act done by, or any right accrued by, or any suit or proceeding had or commenced against the Assignor/Transferor prior to this assignment/transfer.
5)	The Assignee/Transferee certifies that all statements made in this application and in the exhibits, attachments, or documents incorporated by reference are material, are part of this application, and are true, complete, correct, and made in good faith.
6)	The Assignee/Transferee certifies that neither it nor any other party to the application is subject to a denial of Federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C. § 862, because of a conviction for possession or distribution of a controlled substance. See Section 1.2002(b) of the Commission's Rules for the definition of "party to the application" as used in this certification.
7)	The Assignee/Transferee certifies that it is not in default on any payment for Commission licenses and that it is not delinquent on any non-tax debt owed to any federal agency.

DESCRIPTION OF TRANSACTION AND PUBLIC INTEREST STATEMENT

I. Description of Transaction

New Cingular Wireless PCS, LLC (“NCW PCS”), an indirect wholly owned subsidiary of AT&T Inc. (collectively with NCW PCS, “AT&T”), along with WirelessCo, L.P. (“WirelessCo”) and SprintCom, Inc. (“SprintCom”), both indirect wholly owned subsidiaries of Sprint Nextel Corporation (“Sprint Nextel” and collectively with WirelessCo and SprintCom, “Sprint”) (AT&T and Sprint are individually a “Party” and collectively the “Parties”) and currently the licensees of broadband PCS stations KNLF215, KNLF243, KNLF233, KNLF264, KNLF208, KNLF290, KNLF252, KNLF272, and KNLF294 (the “Sprint Licenses” or “Licenses”), hereby seek Commission consent to the partial assignment of the Sprint Licenses to NCW PCS.¹

The Sprint Licenses include three A Block and six B Block broadband PCS licenses. In the proposed transaction, WirelessCo and/or SprintCom will assign 10 MHz from each of the Sprint Licenses to NCW PCS in certain BTAs in the Dallas-Ft. Worth, Denver, New Orleans-Baton Rouge, Des Moines-Quad Cities, Honolulu, San Francisco-Oakland-San Jose, Omaha, Louisville-Lexington-Evansville and Salt Lake City MTAs. The proposed partitions and disaggregations are more specifically described in Exhibit 2 of this application.

The Sprint Licenses are not subject to unjust enrichment payments or transfer restrictions. Further, as described in more detail below and in Exhibit 3, no spectrum aggregation concerns are raised by the transaction. Accordingly, and as set forth more fully below, the Parties respectfully submit that Commission approval of the proposed transaction will serve the public interest, convenience and necessity and request that the Commission expeditiously grant these applications.

II. Commission Approval of the Proposed Transaction is in the Public Interest

Under Section 310(d) of the Communications Act of 1934, as amended, a license may be transferred where the Commission finds “that the public interest, convenience and necessity will be served thereby.”² This standard involves a balancing process that weighs the potential public

¹ This transaction also involves a partial assignment of broadband PCS licenses WPZY677, KNLG500, KNLF212, and WPOK794 from NCW PCS to WirelessCo (ULS File No. 0004329766); a partial assignment of broadband PCS license KNLG500 from NCW PCS to SprintCom (ULS File No. 0004329763); and a full assignment of KNLG533 from NCW PCS to WirelessCo (ULS File No. 0004329752).

For Consent to Transfer Control of Licenses and Authorizations*, Memorandum Opinion and Order, 21 FCC Rcd 11526, 11535 (2006) (“Alltel-Midwest Order”); *Applications of Nextel Communications, Inc. and Sprint Corporation For Consent to Transfer Control of Licenses and Authorizations*, Memorandum Opinion and Order, 20 FCC Rcd 13967, 13976 (2005) (“Sprint-Nextel Order”); *Applications of Western Wireless Corporation and Alltel Corporation For Consent to Transfer Control of Licenses and Authorizations*, Memorandum Opinion and Order, 20

interest benefits of the proposed transaction against any potential harm.³ As demonstrated below, this transaction does not pose any harm and will benefit wireless consumers. In particular, by acquiring control of the spectrum described in Exhibit 2, AT&T will be able to augment its network capacity in order to enhance the scope and depth of services it offers in the affected markets.⁴

In evaluating assignment applications under Section 310(d), the Commission focuses on whether the proposed assignee is qualified to hold Commission licenses.⁵ The qualifications of AT&T to hold and control Commission licenses are matters of public record.⁶ Therefore, there is no question that AT&T possesses the qualifications required to control the spectrum to be partitioned and/or disaggregated from the Licenses.

The Commission has determined that applications that demonstrate on their face that a transaction will yield affirmative public interest benefits and will neither violate the Act or Commission rules, nor frustrate or undermine policies and enforcement of the Act by reducing competition or otherwise,⁷ do not require extensive review and expenditure of considerable resources by the Commission.⁸ This transaction meets this standard and should thus be granted promptly.

A. The Proposed Transaction Serves the Public Interest

Commission approval of the proposed transaction will promote the public interest. The proposed transaction will enable AT&T to achieve greater operational efficiencies and offer improved, more robust and advanced services to meet the needs of new and existing subscribers.⁹ Specifically, the additional spectrum will enable AT&T to increase its system capacity to enhance existing services, better accommodate its overall growth, and facilitate the provision of additional products and services to the public in the geographic areas authorized under the Sprint Licenses.¹⁰ The additional spectrum will also facilitate AT&T's continued deployment of GSM/EDGE and HSDPA/UMTS technologies.¹¹

B. The Proposed Transaction Creates No Competitive Harm – Spectrum Aggregation/Number of Competitors

The proposed transaction will have no adverse competitive effects. It will neither cause an aggregation of spectrum that would pose an anticompetitive risk nor reduce actual competition in any meaningful way for a variety of reasons.¹² First, the proposed transaction will not cause an aggregation of spectrum that would pose an anticompetitive risk. Post-closing, AT&T through affiliated companies under its common control and in which it holds an “attributable interest” for spectrum aggregation purposes, will hold between 30 and 109 MHz of spectrum in each county involved in the transaction. Because AT&T's proposed post-transaction attributable spectrum holdings will not exceed the Commission's initial screen in any county

⁹ Transactions that give rise to these results have been found by the Commission to be in the public interest. See *AT&T-Dobson Order* at ¶¶ 79, 83; *Cingular-AT&T Wireless Order*, 19 FCC Rcd at 21602-04, 21607; *Cingular-NextWave Order*, 19 FCC Rcd at 2585; *Applications of Northcoast Communications, LLC and Celco Partnership d/b/a Verizon Wireless For Consent to Assignment of Licenses*, Memorandum Opinion and Order, 18 FCC Rcd 6490, 6493 (WTB/CWD 2003) (“*VZW-Northcoast Order*”).

¹⁰ Among other things, the Commission's public interest calculus takes into consideration the extent to which the transaction will accelerate the “deployment of advanced services” and “affect the quality of communications services or will result in the provision of new or additional services to consumers.” *AT&T-Dobson Order* at ¶ 12; *Alltel-Western Order*, 20 FCC Rcd at 13064-65; *Cingular-AT&T Wireless Order*, 19 FCC Rcd at 21544.

¹¹ See, e.g., *AT&T-Dobson Order* at ¶ 4.

¹² In evaluating the competitive effects of proposed transactions, the Commission considers the relevant product market and geographic market. With respect to the domestic wireless markets, the Commission has defined the relevant product market as mobile telephony services. See *AT&T-Dobson Order* at ¶ 17. Spectrum suitable for mobile telephony includes cellular, PCS, SMR and 700 MHz spectrum. *Id.* at ¶¶ 17, 30. The Commission has further held that, where available, it will include AWS-1 and BRS spectrum in its evaluation of the competitive effects of proposed transactions. *Applications of Celco Partnership d/b/a Verizon Wireless and Atlantis Holdings LLC For Consent to Transfer Control of Licenses, Authorizations, and Spectrum Manager and De Facto Transfer Leasing Arrangements and Petition for Declaratory Ruling that the Transaction is Consistent with Section 310(b)(4) of the Communications Act*, Memorandum Opinion and Order and Declaratory Ruling, FCC 08-258, at ¶¶ 62-70 (Nov. 10, 2008) (“*Verizon Wireless-ALLTEL Order*”). The Commission has defined the relevant geographic market as the area “within which a customer is most likely to shop for mobile telephony service.” *Id.* at 25; see also *Cingular-AT&T Wireless Order*, 19 FCC Rcd at 21563 (“[T]he appropriate definition of the relevant geographic market is neither national, on the one hand, nor as small as a county on the other.”).

covered by the partitioned and/or disaggregated spectrum, no additional review of this transaction for competitive harm from a spectrum aggregation standpoint is called for.¹³

In a recent Order, the Commission adopted rules intended to “make available an additional 25 megahertz of spectrum for mobile broadband service” in the Wireless Communications Service (“WCS”) band.¹⁴ While WCS spectrum has not previously been included in analyzing the potential competitive impact of transactions, in view of this order, AT&T has provided information regarding its WCS holdings in Exhibits 3 and 4 to this application. If AT&T’s WCS spectrum licenses were included for purposes of analyzing spectrum aggregation and assuming the current initial spectrum screen would be increased by 9 MHz (i.e., one-third of the WCS spectrum that could be attributed to a CMRS carrier), AT&T’s spectrum holdings would remain below an initial spectrum screen that takes into account WCS spectrum.

The proposed transaction also will not reduce actual competition in any meaningful way in any relevant market. To the contrary, the transaction will “preserv[e] and enhance[e] competition.”¹⁵ In fact, the proposed transaction will enhance competition by enabling AT&T to be a more effective competitor, while preserving meaningful competition in this market. Specifically, the transaction will not result in public interest harm in mobile telephony markets “because there will be a continuing presence of multiple other substantial carriers in each overlap market with the capacity to add subscribers and the ability to add capacity.”¹⁶ Indeed, because Sprint is partitioning and disaggregating each of its Licenses, it will continue to hold significant spectrum and offer facilities-based services in each market where AT&T seeks to acquire spectrum. As shown in Exhibit 4, there will remain four or more licensed providers (including AT&T) in each market impacted by the transaction, including all four of the largest wireless carriers. As a result, this transaction “is unlikely to result in collusive behavior or create ‘unilateral’ market power” on the part of the assignee.¹⁷

In this regard, in the *Cingular-AT&T Wireless Order* and the *AT&T-Centennial Order* (hereinafter “Merger Orders”), the Commission conditioned its consent to the Merger Orders on the divestiture by the parties to those transactions of certain AT&T Wireless “Operating Assets”

¹³ See *Verizon Wireless-ALLTEL Order* at ¶ 64 (“For markets in which AWS-1 and BRS spectrum is available, we revise the screen to 145 MHz. For markets in which AWS-1 is available but BRS is not available, we use a spectrum screen of 125 megahertz. For markets in which BRS is available but AWS-1 is not available, we use a spectrum screen of 115 megahertz. Finally, for markets in which neither BRS nor AWS-1 is available, we use a 95 megahertz spectrum screen.”). The current relevant screen for this transaction is either 115, 125, or 145 MHz, depending on the county.

or “Divestiture Assets”) (including spectrum associated with such assets)¹⁸ in the Sherman-Denison, TX CMA (CMA292), Owensboro, KY CMA (CMA293), Louisiana 5 – Beauregard CMA (CMA458), Louisiana 6 – Iberville CMA (CMA459), Louisiana 7 – West Feliciana CMA (CMA460), and Mississippi 8 – Claiborne CMA (CMA500). Certain counties in each of the aforementioned CMAs that were divested are counties in which AT&T proposes to acquire 10 MHz of spectrum from Sprint.¹⁹

Nonetheless, grant of the proposed transaction is in the public interest and neither the *Cingular-AT&T Wireless Order* nor the *AT&T-Centennial Order* should serve as a bar to Commission grant of the proposed assignment. As an initial matter, neither the *Cingular-AT&T Wireless Order* nor the *AT&T-Centennial Order* contains a prohibition on re-acquisition of divested spectrum or acquisition of new spectrum in the divestiture markets.

Moreover, the concern that led to the divestiture requirements, that “there [would] not be enough competing carriers remaining, post-merger, with sufficient network and spectrum assets, to deter anticompetitive behavior by the merged entity,”²⁰ should not be of concern today. With regard to the counties implicated by the *Cingular-AT&T Wireless Order*, the Commission’s imposition of divestiture requirements took place nearly six years ago. There exists today more competition in the market from larger carriers, and all of the national carriers are well-represented in these counties. Since the *Cingular-AT&T Wireless Order*, the Commission has auctioned AWS-1 and 700 MHz spectrum that will further ensure continued competition in these counties.

Approval of AT&T’s acquisition of bare spectrum that will enable AT&T to provide more efficient and enhanced services in the affected counties – whether subject to divestiture requirements in the *Cingular-AT&T Wireless Order* or *AT&T-Centennial Order* – will not cause there to be fewer competitors in any market.²¹ Indeed, Sprint will continue to hold spectrum and offer facilities-based service in all of the affected counties, and no subscribers will be transferred as a result of this transaction.

IV. Conclusion

As demonstrated above, New Cingular Wireless PCS is well-qualified to acquire, control and make beneficial public use of the spectrum proposed to be assigned in this transaction. In

¹⁸ *Cingular-AT&T Wireless Order* at ¶ 254.

¹⁹ Specifically, Grayson County, TX is in the Sherman-Denison, TX CMA; Daviess County, KY is in the Owensboro, KY CMA; Pointe Coupee Parish, LA is in the Louisiana 5 – Beauregard CMA; Iberville Parish, LA is in the Louisiana 6 – Iberville CMA; East Feliciana and West Feliciana Parishes, LA are in the Louisiana 7 – West Feliciana CMA; and Wilkinson County, MS is in the Mississippi 8 – Claiborne CMA. To comply with conditions imposed on the parties in the *Cingular-AT&T Wireless Order* and *AT&T-Centennial Order* divestitures of licenses and operating assets were accomplished in these counties.

²⁰ *Id.*

²¹ The spectrum involved in this transaction is not spectrum that was divested to comply with the Merger Orders.

addition, as set forth above, the proposed transaction will not adversely affect competition. Indeed, grant of this application will promote competition and will otherwise serve the public interest, convenience and necessity. For these reasons, prompt Commission approval of this transaction is warranted.

SPECTRUM AGGREGATION

As New Cingular Wireless PCS, LLC, a subsidiary of AT&T Inc. (“AT&T”), and its affiliates hold direct or indirect interests (of 10% or more) in entities that already have access to 10 MHz or more of CMRS spectrum (through licenses, leases, or subleases) in the same geographic area involved in the proposed transaction, AT&T hereby provides information on potential spectrum overlaps in the market areas in which AT&T proposes to acquire spectrum. The chart below identifies all counties in which the spectrum it proposes to acquire or swap will overlap with its current cellular, broadband PCS, AWS-1, and 700 MHz spectrum holdings.

¹ Although Wireless Communications Service (“WCS”) spectrum is not currently included in the Commission’s initial screen, AT&T is providing information on its WCS holdings based on the Commission’s recent Order adopting rules aimed at making this spectrum suitable for wireless broadband services. AT&T notes that its attributable spectrum is below the current initial spectrum screen. If the FCC includes WCS spectrum and increases the initial screen by one-third of the total WCS spectrum available for mobile services, AT&T’s attributable spectrum would still be below any initial screen that included WCS spectrum. Here, including WCS spectrum, AT&T would hold between 35 and 124 MHz of spectrum in the affected counties. In counties where AT&T’s WCS holdings include the C and/or D blocks, AT&T’s listed WCS spectrum holdings exclude the 5 MHz of C and D Block WCS spectrum in which the Commission has prohibited the operation of mobile units. *Amendment of Part 27 of the Commission’s Rules to Govern the Operation of Wireless Communications Services in the 2.3 GHz Band*, Report and Order and Second Report and Order, FCC 10-82, at ¶ 3 (2010) (stating that WCS mobile and portable devices are not permitted to operate in the 2.5-megahertz portions of the WCS C and D blocks closest to the SDARS band).

² AT&T’s post-transaction attributable spectrum in this county includes an additional 25 MHz of cellular spectrum to be acquired from Caprock Cellular in a transaction currently pending before the Commission.

¹³ The A Block PCS license for the Des Moines-Quad Cities MTA has been partitioned and/or disaggregated into more than 100 smaller licenses, all of which are licensed on the basis of "Iowa Study Areas." See, e.g., call signs WPOH984 and WPOL757. Because of the large number of call signs and licensees in these counties, the individual licensees have not been listed in this competitor chart.

- The Parties are providing this information to the extent it is readily available in the FCC’s electronic databases and from other publicly available sources. Much of the information included in this attachment is not proprietary to either of the Parties and is in the public domain. The Parties have not independently attempted to verify the accuracy of such information, and emphasize that they cannot certify to the accuracy of such information.
- Given that large carriers often operate through subsidiaries that hold licenses, the available Form 602 ownership information listed for the authorized licensees has been reviewed to the extent practicable to determine the parent operating entity. Finally, this table lists only licensed facilities-based carriers, not resellers.
- The information contained in the above chart is based on a search of the cellular, broadband PCS, AWS, WCS, and 700 MHz licensing records in the FCC’s ULS database.
- Data for BRS and ESMR holdings come from Sprint and Clearwire’s June 2008 FCC filing regarding their proposed New Clearwire joint venture. See Sprint/Clearwire Application for Transfer of Control, Exhibit 1, Appendix D, FCC Docket No. 08-94 (amended October 31, 2008), available at <https://wireless2.fcc.gov/UlsEntry/attachments/attachmentViewRD.jsp;ATTACHMENTS=20h7JCHDNlybVC8fnqWhhGbFLWRVZqm2nbjpV37GQp9DGgg4f11m!-849295342!-659400886?applType=search&fileKey=535838453&attachmentKey=18317507&attachmentInd=applAttach>.
- As noted above, licensees who hold call signs licensed on the basis of Iowa Study Areas are not included in this chart.
- This competitor chart assumes the consummation of: (1) AT&T’s acquisition of a cellular license in the Texas 4 – Caprock CMA and (2) AT&T’s acquisition of PCS spectrum from a subsidiary of Cricket in the Owensboro, KY BTA. All entries in the chart that are contingent on the consummation of these transactions are marked with an asterisk (*).
