Dear Ms. Dortch,

On December 8, 2010, Mike Rhoda, Eric Einhorn, and Jennie Chandra, from Windstream Communications, Inc. ("Windstream"), met with Commissioner Mignon Clyburn and her legal advisors, Dave Grimaldi, Angela Kronenberg, and Louis Peraertz. Consistent with its filings in GN Docket Nos. 09-191 and 10-127, Windstream urged that any open internet regulations should apply equally to wired and wireless broadband services. Stricter regulation of wired broadband services will distort the competitive marketplace, and the alleged differences between wired and wireless networks are at most matters of degree, not kind, and do not justify placing the technologies under different regulatory standards. Windstream provided copies of the attached article.

In addition, consistent with its various statements in the above-referenced proceedings, Windstream discussed the need for comprehensive, rational reform of the intercarrier compensation system and the universal service high-cost program, and expressed its continued support for the general framework set out in the National Broadband Plan. As an important first step toward reform, Windstream recommended that the Commission promptly issue an Order confirming that VoIP providers placing IP traffic over switched access facilities must pay jurisdictionalized access charges.

If you have any questions or need any additional information, please feel free to contact me.

Sincerely,

/s/

Malena F. Barzilai
