Dear Chairman Genachowski:

RE: GN Docket 09-191; WC Docket No. 07-52

Attached please find tens of thousands of signatures from Americans who have urged Washington policymakers to create rules that protect real Net Neutrality. We are concerned that the FCC is in the process of creating a rule that simply doesn't meet any meaningful standard of Net Neutrality protections.

Accordingly, over the course of the next two days, we will be submitting by hand two million signatures from members of the public who believe that the open Internet is vital to our future and must be protected.

Don't open the door for Internet Service Providers to engage in practices that will harm consumers by stifling free speech, equal opportunity and economic innovation. The public wants real Net Neutrality.

Respectfully submitted,

The SavetheInternet.com Coalition

"To the FCC: As the major regulatory agency with respect to Internet access, it is imperative that you support Net Neutrality. Corporations like AT&T, Comcast and others who control access to the net will always act to their own benefit. Given the ability to control how content is delivered, they will give preferential treatment to the content that makes them the most money. The net is not about money - yes, money can be earned on the net, but that was never its purpose. Originally, it was designed to allow the sharing of knowledge - first within the government and academic institutions. It has grown to allow everyone (no matter their income level, age, race, etc) to disseminate and access knowledge from around the world. There is no more important function. We have seen how control of Internet resources by government in places like China and Iran has hampered democracy. Control by corporations would be no better."

"The Internet has revolutionized communication - do you think it would have done so as gloriously if it were regulated?? Please let humanity's first great free speech / collective intelligence achievement live. The FCC must keep the Internet open and free of corporate gatekeepers. I urge you to side with Internet users like me who favor a free and open Internet, instead of corporate interests who have financial incentives to limit a free-flowing web. Don't squelch human expression with short-sightedness and don't hand it to the whining and pounding of the gimme-gimmes. "

Christopher T Volpe

"To the FCC: Net neutrality is at the heart of the Internet. It's why the Internet has been such a powerful engine for free speech, democratic participation and economic innovation. Companies want to be Internet gatekeepers, deciding which Web sites go fast or slow and which won't load at all. Such online discrimination should not be tolerated. "

Carrie Walker
Dummerston, VT 05301

"To the FCC: Please protect free speech in the United States in the form of net neutrality. It horrifies me to think that my internet provider, Verizon, would have the ability to filter the information that gets through to me on the internet. For me the internet is a unique source of information that I would not otherwise receive. As a teacher I believe in information sharing as a form of education and participation for all citizens. Please keep our democracy alive on the internet."

"To the FCC: Please rule in favor of the people and not the big telecom companies. "

"To the FCC: The internet must be kept free from control from monopolistic media forces that will bring along with them a gatekeeper roll of what "they" think is good for U.S. citizens. Net neutrality must be kept alive."

"To the FCC: Save the neutrality of the internet. Big money controls far too much of our financial lives and it would be unbelievably dangerous to accede to the loss of our free and unfettered ability to voice our concerns with our citizens. Let the reactions of even a totally dominated people like the Iranians serve as a warning to those who would attempt to control our ideas and the expression of them. Our much admired and beloved Constitution now guarantees the right of free speech. Let us not endanger or change it. Conley W. Montgomery Madison, WI "

"To the FCC: Net neutrality is more than important and necessary. What will happen if our government allows corporations to control the speed at which we receive vital and not so vital information? Who's to know the difference? It's imperative we, the people, have the information we need, when we need it. Thank you. Chris Wrinn "

"To the FCC: The Internet has been a powerful engine for free speech, democratic participation and economic innovation, and a big part of the reason is net neutrality. It has become increasingly accessible to the masses and is something that helps the whole nation and the communities within it to remain informed, intelligent participants in things that affect their own lives. Companies should not be internet gatekeepers, ruling over what free information is available to citizens. Nor should it be allowed to manage the cost or stifle communication they don't like. This would lead to censorship, and worse, lessen the abilities of American citizens to use their right to access and share ideas, information and everything else that is covered by the first ammendment. Without net neutrality, the internet will become an attack on free speech. Why should corporations have power to discriminate and have control over the most important innovation in communication ever imagined? It would be an attack on the American public. Please support net neutrality."

"To the FCC: I use the Internet daily ... for news, for personal communication, for business, and professionally (I teach online college classes). I do not want the FCC to give big business – the telecoms or any other corporate interests – any control over how "we the people" use the internet. Please continue to support Net Neutrality. Corporate interests should not be allowed to block access to certain web content, or block web sites or applications that might "interfere" with their own profit margins. Neither should corporate interests be allowed to favor some "paid" content by making it load faster, etc. The Internet is and should remain a free and open public resource, not a potential corporate profit center."

"To the FCC: The huge contribution of the Internet is that it powerfully supports the basic principles of our Constitution - principles like free speech. It profoundly supports democracy by offering a way to build community and inform and connect like minded people of all points of view. Net neutrality maintains our principles and our democracy. Thank you for supporting what our Country is all about with your proposed rules which maintain net neutrality."

Cynthia Funk

"To the FCC: I rely upon people everywhere having free access to the internet, not just for my business (which completely relies upon such freedom), but also in order that I can find out what is really happening around the world through posts on blogs and twitter and other social sites. While some people can afford things like cell phone monthly rates, and such pay models may seem to work in those cases - I am certain that the future of our world economies, environment, social equality and more absolutely depend upon the fair and free access of all people to all information. Please, please please support Net Neutrality! The world's future depends upon it. Sincerely, Cynthia"

"To the FCC: I am contacting you to urge you to keep the Internet free and neutral. As an ordinary citizen, I strongly object to commercial interests taking over yet another aspect of my life and depriving me of yet another aspect of my freedom. I am sure you have heard much from commercial internet "providers" and their corporate lobbying organizations in their efforts to persuade you that free and neutral means freedom from oversight and freedom from public scrutiny. Neutrality is one of the few things the Internet has left going for it. It is an aspect of the system that contributes to democracy and genuine access to information. Please stand up to corporate lobbyists and the likes of Comcast and AT&T. It is time to make net neutrality the law of the land once and for all."

Cynthia McNamara

I got the point in the first term of George W. Bush's administration before he lame-ducked out for lies and no limits on his spend-thrift free pass. We often had interference in even receiving NewsHour news-coverage and commentary when it didn't agree with the administration. Our European friends on line could hardly believe this was real. We had to let them know, then The New York Times cut me off in the first half year of the lame duck second term when it became public knowledge that Bill Keller was being threatened with physical damage by right wing street activists in New York. Guess who publicly condemned Keller from within the web-site of nytimes.com and pages of The New York Times? The visiting Public Editor from (you ready for this?)the Wall Street Journal. How does that reverberate now almost five years later? Sincerely, Dianne Jarreau Lancaster, Pa."

"To the FCC: * Net neutrality is at the heart of the Internet. It's why the Internet has been such a powerful engine for free speech, democratic participation and economic innovation. * Net neutrality is about giving citizens the information and tools they need to hold their leaders accountable and shape the decisions affecting their lives. The Internet is an essential infrastructure for democracy. * Companies want to be Internet gatekeepers, deciding which Web sites go fast or slow and which won't load at all. Such online discrimination should not be tolerated."

"To the FCC: Net neutrality is "democracy in action" so why in the world would the FCC rule to allow large media companies control over access, content and speed? It has been demonstrated time and time again that these large media companies are driven by greed and a very real desire to control informational content for their political backers. Just look at what is happening in a very anti-democratic China if you want to see the results of this kind of control. Control of the internet by a few is anti-democracy at work and not good for America."
