

The FCC is suppose to act in the public interest and I'm asking you to do so regarding the merger between Comcast and NBC Universal. This is the not so insignificant tip of the iceberg/slippery slope to corporate control by a few mega corporations of the content available via the internet. I strongly object to the clandestine nature of this deal without proper oversight and public input through congressional hearings. Please do not allow this merger to lead us all down the path of corporate domination and mediocracy of the internet!
