December 20, 2010

Dear Mr. Genachowski,

Please accept the enclosed 77,679 petitions— gathered from citizens representing every state in the nation who oppose the Federal Communications Commission’s plan of seizing federal control of the Internet under the thin veneer of promoting “freedom” for all.

The Internet needs no regulation and is arguably the greatest free-market mechanism our nation has ever seen. The fact that the federal government is scheming to take control will be a blow to the free market, and ultimately our Free Speech rights as citizens.

Our petition states:

As a concerned citizen, I am signing this petition opposing the so-called “Net Neutrality” regulations being considered by the Federal Communications Commission, or similar legislation in Congress or the states. Net Neutrality imposes government control on the free market of the Internet and is yet another statist power grab. The FCC does not have the authority to force such sweeping regulations on the free market. I strongly oppose this effort and urge the FCC to: a) keep government control out of the Internet, and, b) leave the legislating to Congress.

In short, the American people oppose what amounts to a federal power-grab of the Internet and the regulation, rationing and control that is certain to follow.

If you would like to respond to those who have signed our petition, please contact me at: 757-487-7900.
