

The High Plains Library District has been pursuing options to provide every household within its service area (approx 54,000 households) with a smart device. We are starting talks with large carriers and manufacturers to assess paths to formalize this opportunity. This effort is an obvious counterpart and compliment to the E-Rate Deployed Ubiquitously (EDU) 2011 Pilot Program. If the deadline is being extended or if there is an opportunity to be considered for the Erate Pilot please contact me. For information about the High Plains Library District visit our website at <http://www.mylibrary.us>.
