Before the
FEDERAL COMMUNICATIONS COMMISSION
Washington, D.C. 20554

In the Matter of: Petitions regarding the use of signal boosters and other signal amplification techniques used with wireless services. (WT Docket No. 10-4)

Attached is a list of over 350 State/Governmental organizations, Schools, Universities, Hospitals & Medical Centers that have purchased and use signal boosters manufactured by Wilson Electronics, Inc.

All of these organizations require the use of cellular signal boosters for the use of their mobile phones and for carrying out their operations. We bring this list before the FCC, to supplement the list supplied by Wilson Electronics, Inc on 24th November 2010 (Filing no. 7020921551), to demonstrate the requirement of these organizations for cellular signal boosters. A cursory glance through these lists will affirm that they comprise much of the organizational backbone of America. In short, America has a fundamental requirement of cellular signal boosters in order to function.

We urge the FCC to note this requirement and move to formally recognize the importance of cellular signal boosters in current day usage. It is the position of RepeaterStore that any fair appraisal of the use of cellular signal boosters must take account of the enormous public service boosters are currently providing.

Yours Faithfully,

Brendan Gill
