

**WC Docket No. 02-60**

**Rural Health Care Pilot Program**

**Quarterly Data Report – January 2011**

**Participant: NEW ENGLAND TELEHEALTH CONSORTIUM**

1. Project Contact and Coordination Information

- a. Identify the project leader(s) and respective business affiliations.

**Brian Thibeau, President, NETC  
Chief Administrative Officer – Penquis**

- b. Provide a complete address for postal delivery and the telephone, fax, and e-mail address for the responsible administrative official.

**Brian Thibeau  
New England Telehealth Consortium  
262 Harlow Street  
PO Box 1162  
Bangor, ME 04402-1162**

**Telephone: (207) 973-3511**

**Fax: (207) 941-1040**

**Email: bthibeau@penquis.org**

- c. Identify the organization that is legally and financially responsible for the conduct of activities supported by the award.

**New England Telehealth Consortium**

- d. Explain how project is being coordinated throughout the state or region.

**The New England Telehealth Consortium has brought together a majority of the hospitals and their affiliates in Vermont, New Hampshire, and Maine. Totalling over 400 healthcare sites across the region, the consortium is working to develop the network.**

2. Identify all health care facilities included in the network.

- a. Provide address (including county), zip code, Rural Urban Commuting Area (RUCA) code (including primary and secondary), six-digit census tract, and phone number for each health care facility participating in the network.

- b. For each participating institution, indicate whether it is:

i. Public or non-public;

ii. Not-for-profit or for-profit;

iii. An eligible health care provider or ineligible health-care provider with an explanation of why the health care facility is eligible under section 254 of the 1996 Act and the Commission's rules or a description of the type of ineligible health care provider entity.

**MaineHealth/MMC - MaineHealth Corporate****Address** 110 Free Street **City** Portland **County** Cumberland **State** ME **ZIP** 04101**Telephone** 207-775-7001 **RUCA** 1 **Census Tract No** 0003.00 **Public?** Yes **Non-Profit?** Yes **Eligible?** No**Eligibility Explanation** This entity supports administrative functions for Maine Medical Center, which has been deemed eligible and therefore, we believe that this site is eligible. Due to growth, some required administrative functions of the hospital have been moved to an offsite building such as this to better facilitate patient care. The healthcare provider cannot function without this administrative office and does not do these functions internally. To function, this site requires a connection to the NETC network for communication with the hospital. This entity is Maine Medical Center's corporate administration offices. Maine Medical Center is licensed as an acute care hospital by the State of Maine Department of Health and Human Services and recognized as tax-exempt by the Internal Revenue Service. This site is on the Medicare Cost Report of the healthcare provider.**MaineHealth/MMC - Outpatient Radiation Therapy****Address** 175 Congress Avenue **City** Bath **County** Sagadahoc **State** ME **ZIP** 04530**Telephone** 207-443-5866 **RUCA** 7.4 **Census Tract No** 9805.00 **Public?** Yes **Non-Profit?** Yes **Eligible?** Yes**Eligibility Explanation** Site is either (1) licensed as an acute care hospital by the State of Maine Department of Health and Human Services and recognized as tax-exempt by the Internal Revenue Service; (2) a fully-owned subsidiary of such a hospital, or (3) a department of such a hospital.**MaineHealth/MMC - Radi Billing & Transcr, Virology, OR Booking****Address** 48-52 Gilman Street **City** Portland **County** Cumberland **State** ME **ZIP** 04102**Telephone** 207-662-2512 **RUCA** 1 **Census Tract No** 0013.00 **Public?** Yes **Non-Profit?** Yes **Eligible?** Yes**Eligibility Explanation** This entity provides healthcare and supports administrative functions for Maine Medical Center, a not for profit hospital, and as such is eligible. The health care provider cannot function without administrative office and does not do these functions internally (The definition of an eligible administrative site according to Rich Roller's spreadsheet sent 3/27/2008). Administrative services include: Radiology PACS IS department and OR Booking. Radiology Billing and Transcription were recently moved to another site. Healthcare is provided at the Virology Treatment Center (HIV). This entity is a department of Maine Medical Center, which is licensed as an acute care hospital by the State of Maine Department of Health and Human Services and recognized as tax-exempt by the Internal Revenue Service. See letter, Google Earth screenshot, and MapQuest (<http://www.mapquest.com/maps?city=Portland&state=ME&address=52+Gilman+Street>) for verification. This site is on the Medicare Cost Report of the healthcare provider.**MaineHealth/MMC - Scarborough Campus****Address** 98-102 Campus Drive **City** Scarborough **County** Cumberland **State** ME **ZIP** 04074**Telephone** 207-662-0111 **RUCA** 1 **Census Tract No** 0039.00 **Public?** Yes **Non-Profit?** Yes **Eligible?** Yes**Eligibility Explanation** Site is either (1) licensed as an acute care hospital by the State of Maine Department of Health and Human Services and recognized as tax-exempt by the Internal Revenue Service; (2) a fully-owned subsidiary of such a hospital, or (3) a department of such a hospital.

**Martin's Point Health Care/TW data center****Address** 340 Cumberland Avenue                      **City** Portland                      **County** Cumberland                      **State** ME **ZIP** 04101**Telephone** 207-774-5801    **RUCA** 1                      **Census Tract No** 0003.00                      **Public?** Yes                      **Non-Profit?** Yes                      **Eligible?** No**Eligibility Explanation** This site will connect to the NETC network through their central data center. The purpose of the RHCPP and NETC is to build a network that will transmit electronic health information (i.e. Electronic Health Records, digital imaging, telemedicine, etc) from data centers to sites on the network. Therefore, this network cannot function without sites having electronic access to data centers on the NETC network. This is a data center for Martin's Point Health Care, which is an eligible entity under RHCPP. We believe this data center should also be eligible under RHCPP. Martin's Point Health Care's clinics are a contracted network provider to Martin's Point Health Care's health plan contract with the Department of Defense's Uniformed Service Family Health Plan (USFHP). The clinics also provide healthcare services to non military patients. MPH's USFHP health plan is accredited by URAC. As such, their clinics are subject to a variety of URAC requirements relative to their role as a USFHP network provider.**Martin's Point Health Care/Veranda****Address** 331 Veranda Street                      **City** Portland                      **County** Cumberland                      **State** ME **ZIP** 04104**Telephone** 207-774-5801    **RUCA** 1                      **Census Tract No** 0023.00                      **Public?** Yes                      **Non-Profit?** Yes                      **Eligible?** Yes**Eligibility Explanation** Martin's Point Health Care operates primary care clinics in multiple communities and provides services to patients under a variety of commercial and governmental health insurance programs. **Eligibility Explanation** Our draft design requires that NETC will host network technology and data that will be required for the successful operation of the NETC network. Therefore, a connection from the NETC office to the NETC network is required for functionality of the NETC network. FCC Order (WC Docket No. 02-60, Sec 254, (h)(5)(B)): "HEALTH CARE PROVIDER- The term 'health care provider' means-- '(i) post-secondary educational institutions offering health care instruction, teaching hospitals, and medical schools; '(ii) community health centers or health centers providing health care to migrants; '(iii) local health departments or agencies; '(iv) community mental health centers; '(v) not-for-profit hospitals; '(vi) rural health clinics; and '(vii) consortia of health care providers consisting of one or more entities described in clauses (i) through (vi)." Since NETC is a consortia of eligible healthcare providers and a network connection is required for the functioning of the network, we believe that NETC is eligible. This entity is a consortium of eligible health care providers including institutions offering health care instruction, community health centers, local health departments, community mental health centers, non profit hospitals, FQHCs, and rural health clinics participating in NETC.

**Eligibility Explanation** This site will connect to the NETC network through their central data center. The purpose of the RHCPP and NETC is to build a network that will transmit electronic health information (i.e. Electronic Health Records, digital imaging, telemedicine, etc) from data centers to sites on the network. Therefore, this network cannot function without sites having electronic access to data centers on the NETC network. This entity serves as the data center for Dental Program/Molar Express, which is a mobile not-for-profit rural health clinic. The data center is necessary for providing access to Electronic Health Records.

Vermont State Statute, Title 18, "Health", § 7205. Supervision of institutions: The department of mental health shall operate the Vermont State Hospital and shall be responsible for patients receiving involuntary treatment at a hospital designated by the department of mental health. ☐

**Vermont Information Technology Leaders/VITL Data Center**

**Address** 40 IDX Drive **City** South Burlington **County** Chittenden **State** VT **ZIP** 05401

**Telephone** 802-223-4100 **RUCA** 1 **Census Tract No** 0033.00 **Public?** Yes **Non-Profit?** Yes **Eligible?** No

**Eligibility Explanation** This site will connect to the NETC network through this central data center. The purpose of the RHCPP and NETC is to build a network that will transmit electronic health information (i.e. Electronic Health Records, digital imaging, telemedicine, etc) from data centers to sites on the network. Therefore, this network cannot function without sites having electronic access to data centers on the NETC network. This is a data center for a group of non-profit hospitals, community health centers, and community mental health centers which are eligible entities under the RHCPP. We believe this data center should also be eligible under RHCPP. Statute 22 VSA 903 relevant to VITL and statewide HEIN: "(2) VITL shall be designated in the plan to operate the exclusive statewide health information exchange network for this state, notwithstanding the provisions of subsection (g) of this section requiring the recommendation of the commissioner and the approval of the general assembly before the plan can take effect. Nothing in this section shall impede local community providers from the exchange of electronic medical data." This statute was created in Act 70 (2007) and is an appendix in the VHITP. Vermont Information Technology Leaders provides administrative functions for: Alburg Health Center, Brattleboro Memorial Hospital, Brattleboro Retreat, Central Vermont Medical Center, CHCRR - Brandon Medical Center, CHCRR - Castleton Family Health Center, CHCRR - Dental Office, CHCRR - Mettowee Valley Family Health Center, Clara Martin Center - 100 Berl, Clara Martin Center - 11 Main Street Randolph, Clara Martin Center - 1483 LP Rd Bradford, Clara Martin Center - 24 Main Street Randolph, Clara Martin Center - 39 FF Rd Wilder, Clara Martin Center - BIS, Clara Martin Center - EVA, Community Health Center of the Rutland Region, Copley Hospital, Enosburg Health Center, Fletcher Allen Health Care, Gifford Medical Center, HowardCenter, Killington Medical Clinic, Little Rivers Health Care - Bradford, Mt. **Eligibility Explanation** Licensing by the State of Maine Department of Human Services as an Acute Care Hospital and Certified by CMS as a Medicare Provider.

3. Network Narrative: In the first quarterly report following the completion of the competitive bidding process and the selection of vendors, the selected participant must submit an updated technical description of the communications network that it intends to implement, which takes into account the results its network design studies and negotiations with its vendors. This technical description should provide, where applicable:

**The network design has been completed. RFPs for the selection of providers to deliver network services, equipment, build management, and NOC operations have been prepared and were posted on USAC Website on January 25, 2011. At this time, NETC is in the 28 day public notice period which will close on February 23, 2011, at which time NETC will begin evaluating the proposals received.**

a. Brief description of the backbone network of the dedicated health care network, *e.g.*, MPLS network, carrier-provided VPN, a SONET ring;

**Services have not yet been selected, so backbone has not been established.**

b. Explanation of how health care provider sites will connect to (or access) the network, including the access technologies/services and transmission speeds;

**Services have not yet been selected, so connections have not been established.**

c. Explanation of how and where the network will connect to a national backbone such as NLR or Internet2;

**Services have not yet been selected, so national backbone connection location and method has not been established.**

d. Number of miles of fiber construction, and whether the fiber is buried or aerial;

**Services have not yet been selected, so fiber construction, if any, has not been identified.**

e. Special systems or services for network management or maintenance (if applicable) and where such systems reside or are based.

**Services have not yet been selected, so special systems or services have not yet been determined.**

4. List of Connected Health Care Providers: Provide information below for all eligible and non-eligible health care provider sites that, as of the close of the most recent reporting period, are connected to the network and operational.

**Network is not yet implemented nor is it operational – no sites are currently connected.**

a. Health care provider site;

**“None Connected”**

b. Eligible provider (Yes/No);

**“None Connected”**

c. Type of network connection (*e.g.*, fiber, copper, wireless);

**“None Connected”**

d. How connection is provided (*e.g.*, carrier-provided service; self-constructed; leased facility);

**“None Connected”**

e. Service and/or speed of connection (*e.g.*, DS1, DS3, DSL, OC3, Metro Ethernet (10 Mbps);

**“None Connected”**

f. Gateway to NLR, Internet2, or the Public Internet (Yes/No);

**“None Connected”**

g. Site Equipment (*e.g.*, router, switch, SONET ADM, WDM), including manufacturer name and model number.

**“None Connected”**

h. Provide a logical diagram or map of the network.

**“None Connected”**

5. Identify the following non-recurring and recurring costs, where applicable shown both as budgeted and actually incurred for the applicable quarter and funding year to-date.

**Network design has been completed with a non recurring cost of \$877,805.**

a. Network Design

**“Budget, \$877,805, Actual, \$877,805”**

b. Network Equipment, including engineering and installation

**“Budget, \$0; Actual, \$0”**

c. Infrastructure Deployment/Outside Plant

**“Budget, \$0; Actual, \$0”**

i. Engineering

**“Budget, \$0; Actual, \$0”**

ii. Construction

**“Budget, \$0; Actual, \$0”**

d. Internet2, NLR, or Public Internet Connection

**“Budget, \$0; Actual, \$0”**

e. Leased Facilities or Tariffed Services

**“Budget, \$0; Actual, \$0”**

f. Network Management, Maintenance, and Operation Costs (not captured elsewhere)

**“Budget, \$0; Actual, \$0”**

g. Other Non-Recurring and Recurring Costs

**“Budget, \$0; Actual, \$0”**

6. Describe how costs have been apportioned and the sources of the funds to pay them:

**Network design was completed and each participating site, whether eligible or non eligible, was assessed its equal share of the 15% match required.**

a. Explain how costs are identified, allocated among, and apportioned to both eligible and ineligible network participants.

**Network design costs were allocated and apportioned equally to each site, whether eligible or ineligible.**

b. Describe the source of funds from:

i. Eligible Pilot Program network participants

**Eligible network participants have each paid an equal share of the 15% match for Network Design.**

ii. Ineligible Pilot Program network participants

**Ineligible network participants have each paid an equal share of the 15% match for Network Design.**

c. Show contributions from all other sources (*e.g.*, local, state, and federal sources, and other grants).

i. Identify source of financial support and anticipated revenues that is paying for costs not covered by the fund and by Pilot Program participants.

**None**

ii. Identify the respective amounts and remaining time for such assistance.

**N/A**

d. Explain how the selected participant’s minimum 15 percent contribution is helping to achieve both the selected participant’s identified goals and objectives and the overarching goals of the Pilot Program.

**At this time, participants’ contributions have allowed the envisioned network to actually be designed. Scoping documents to build and operate the designed network were prepared and were posted on the USAC website on January 25, 2011.**

7. Identify any technical or non-technical requirements or procedures necessary for ineligible entities to connect to the participant’s network.

**Ineligible entities will be required to pay 100% of all costs associated with their respective establishments in order to connect to the New England Telehealth Consortium network.**

8. Provide an update on the project management plan, detailing:

a. The project’s current leadership and management structure and any changes to the management structure since the last data report; and

**NETC President: Brian Thibeau (CAO – Penquis, Bangor, Maine)**

**NETC Vice President: Martha McLeod (Exec. Dir. – North Country Health Consortium, Whitefield, New Hampshire)**

**NETC Secretary: Charlie Kimball (CTO – Eastern Maine Healthcare, Brewer, Maine)**

**NETC Treasurer: Tim Smith (CFO - Webber Energy, Bangor, Maine)**

**NETC At Large: Red Hutchinson (CIO, LRG Healthcare, Laconia, New Hampshire)**

**NETC At Large: Daniel Burgess (CIO, MaineGeneral Health, Augusta, Maine)**

b. In the first quarterly report, the selected applicant should provide a detailed project plan and schedule. The schedule must provide a list of key project deliverables or tasks, and their anticipated completion dates. Among the deliverables, participants must indicate the dates when each health care provider site is expected to be connected to the network *and operational*. Subsequent quarterly reports should identify which project deliverables, scheduled for the previous quarter, were met, and which were not met. In the event a project deliverable is not achieved, or the work and deliverables deviate from the work plan, the selected participant must provide an explanation.

#### **Work Plan**

- 1. Conduct the initial network design studies for the consortium that will: address the needs of its Members and their respective healthcare sites; determine how to deploy an efficient and private broadband regional telehealth network that includes multiple locations and various technologies; determine Internet2 connectivity (Completed: June 2010)**
  - a. Needs Assessment
  - b. Determine current Telehealth and Telemedicine Applications
  - c. Determine needed Telehealth and Telemedicine Applications
  - d. Determine the current LAN and WAN infrastructure at sites
  - e. Determine needed bandwidth
  - f. Determine security requirements
  - g. Determine redundancy requirements
  - h. Determine Quality of Service requirements
  - i. Determine how to connect sites' existing network to the new consortium network
  - j. Determine Internet2 connectivity requirements for each healthcare site
  - k. Determine Internet2 connectivity for the entire network
  - l. Determine Telehealth and Telemedicine applications available on Internet2 that will be used by sites on the network
- 2. Determine the final network design (Completed: June, 2010)**
  - a. Incorporate the results of the site needs assessment in the WAN design
  - b. Engineer the network structure
  - c. Engineer Internet2 connectivity
  - d. Engineer Layer 1 through 7 requirements
  - e. Determine WAN Service topologies that best fit the consortium needs, is commercially available, and cost effective

- f. Determine sites that need alternate WAN technologies due to remote location or mobility (i.e. Healthcare trucks and ships)
  - g. Determine and design network equipment requirements
  - h. List the network connectivity requirements (bandwidth, encryption, Quality of Service, redundancy) for each site.
3. Ensure compliance of consortium with USAC Rural Health Care program procedures (Estimated: anticipated to occur approximately 180 days following USAC authorization to proceed with RHCPP funding.) *(Scoping documents for network services and equipment have been drafted. As of the end of the quarter, December 31, 2010, USAC is still reviewing the NETC site list and the submitted RFPs).*
- a. Appoint the USAC process manager
  - b. Determine the criteria for “most cost effective bids”. The most cost effective method is the method of least cost after consideration of the features, quality of transmission, reliability, and other factors relevant to choosing a method of providing the required services.
  - c. Write Request For Proposals’ (bids) for WAN Services and WAN Infrastructure
4. Manage the Implementation (Infrastructure Deployment) of the Network (Estimated: approximately 12 months following USAC authorization to proceed with RHCPP funding.) *(In process of preparing scoping documents for implementation management. As of the end of the quarter, December 31, 2010, USAC is still reviewing the NETC site list and the submitted RFPs).*
- a. Assign Project Managers
  - b. Manage vendor implementation meetings
  - c. Flow Chart implementation schedule
  - d. Assign implementation team members
  - e. Schedule implementation team members
  - f. Finalize WAN services and infrastructure details for each site in network (bandwidth, location, encryption, QoS, addressing schema, I2 integration)
  - g. Schedule and oversee equipment configuration, burn in, and distribution
  - h. Coordinate WAN services, WAN infrastructure, and Internet2 vendors
  - i. Coordinate Telehealth and Telemedicine applications that will be implemented on the network

9. Provide detail on whether network is or will become self sustaining. Selected participants should provide an explanation of how network is self sustaining.

### New England Telehealth Consortium Sustainability Plan

#### I. Minimum 15% Funding Match

- In order to be a participant in New England Telehealth Consortium, each entity was required to sign a contract pledging payment of the 15% match per the rules of the Rural Health Care Pilot Program.

## II. Sustainability Plan

- NETC is planning a sustainability period of 10 years. Based on our network design, NETC plans to use the RHCPP award to primarily purchase leased network services. It is our plan to leverage our size and our RHCPP award to get very competitive rates for a 10 year sustainability period. NETC desires that responding vendors separate network services pricing into a non-recurring component and a recurring component. The non-recurring component would be paid monthly starting in month 1 and continuing through month 24. The non-recurring component will be paid with NETC's RHCPP 85% cost reimbursement money, in addition to eligible sites 15% contribution. The recurring component would be paid monthly starting in month 25 and continuing through month 120. The recurring component will be paid by each NETC site without any RHCPP reimbursement. Ineligible sites will pay their fair share. These very competitive rates will make the network affordable and provide participating entities with affordable 10 year network costs.

## III. Principal Factors

- The New England Telehealth Consortium (NETC) will ensure the sustainability of the network by ensuring the future of the Consortium itself. NETC's network sustainability is based on creating a common vision, mission and strategic plan for growth that is agreed, understood and supported by consortium members, other participating organizations and the public.
- The principal factors of the NETC sustainability plan are as follows:
  - Although a limited number of NETC sites have used the regular Rural Health Care Universal Service Fund, many of the NETC sites have not used the regular Rural Health Care Universal Service Fund in the past. Due to the very rural nature of most of the sites in Maine, New Hampshire and Vermont, NETC expects that many participating entities will qualify for the regular Rural Health Care Universal Service Fund. NETC plans to pursue the use of the Rural Health Care Universal Service Fund for all Rural Health Care USF eligible entities in order to help make the cost of the network affordable during the 10 year sustainability period and after our RHCPP funds have been expended.
  - NETC plans to build capacity among members by using existing resources already developed by members to the fullest potential. Those resources include, but are not limited to, shared telehealth and telemedicine services, research, clinical expertise, and educational opportunities. NETC believes that by sharing these resources among partners through collaborative efforts in the NETC network, healthcare costs will be reduced which will increase affordability and help cost-justify ongoing network expenses beyond the RHCPP award. The reduction of healthcare costs and the economic benefits brought about through health information technology networks are well known and well documented. The US Department of Health and Human Services Agency for Healthcare Research and Quality (AHRQ), includes a "Health Information Technology Costs and Benefits Database Project" containing many articles outlining the dramatic economic benefits of Health Information Technology.<sup>1</sup> In addition, Health InfoNet, a

---

<sup>1</sup> U.S. Department of Health and Human Services, Agency for Healthcare Research and Quality (AHRQ), <http://healthit.ahrq.gov/portal/server.pt?open=512&objID=654&&PageID=5982&mode=2&cached=true>

collaborative e-health project in Maine, includes on their web site a compilation of articles that highlight the economic value of electronic health information exchange.<sup>2</sup> Finally, regarding e-prescribing, some studies estimate a savings for the Federal Government of up to \$26 billion in just the Medicare program.<sup>3</sup>

- NETC plans to expand opportunities for non-members to participate in the NETC network. The future participation of additional healthcare entities will bring in additional revenue to help fund the network for the 10 year sustainability period.
- Obtain diversified funding to ensure the future of the Consortium and promote growth. NETC has and will continue to work to secure additional grants to help support the network over the 10 year sustainability period.
- The ARRA Broadband Technology Opportunities Program has granted \$116,963,386 for middle mile infrastructure in our 3 state region. \$26,832,500 has been awarded in Maine; \$44,480,992 has been awarded in New Hampshire; and \$45,649,894 has been awarded in Vermont. While these are not direct grants to NETC, they have the potential to enable NETC to achieve further cost savings which would enhance sustainability. NETC could potentially migrate to these networks when completed in approximately three years.
- Measuring and evaluating activities with the intention of continuous improvement and growth. It is our hope that continued growth and improvement in the network and use of the network will continue to reduce network costs and bring in additional revenue.
- The savings from the difference between existing high priced circuits and new low priced NETC circuits will be used to pay for the network over the 10 year sustainability period.
- NETC will continue to build a constituency of supporters throughout the three states including healthcare professionals, elected officials, business leaders, religious leaders, neighborhood and civic leaders, local foundation leaders, educational leaders and others. It is our hope that this constituency of supporters will help the NETC network to grow which will bring in additional members and revenue to help pay for the network over the 10 year sustainability period.

#### IV. Terms of Membership in the Network

- New England Telehealth Consortium members are comprised of not for profit healthcare organizations as well as for-profit healthcare organizations. To be eligible for cost reimbursement funding under the Pilot Program, sites had to meet the requirements of the 1996 Act, Section 254H7B and applicable amendments by the FCC which defines “health care provider” as: post-secondary educational institutions offering health care instruction, teaching hospitals, and medical schools; community health centers or health centers providing health care to migrants; local health departments or agencies;

community mental health centers; not-for-profit hospitals; rural health clinics; and consortia of health care providers consisting of one or more entities described above. For-profit organizations have agreed by contract to pay 100% of network costs and not for profit organizations have agreed to pay 15% of network costs in order to participate in the NETC network.

#### V. Ownership Structure

- Based on our network design, NETC plans to use the RHCPP award to primarily purchase leased network services. Therefore, it is our intent that the network will actually be owned by the carrier or vendor that provides the network leased services and NETC will pay for the use of the network under a 10 year sustainability contract.

#### VI. Sources of Future Support

- The NETC network will be sustainable for 10 years. Members have committed by contract to pay ongoing network fees for the duration of the sustainability period. The likelihood and commitment to fulfill the contract is based on NETC procuring lower than current WAN costs while providing increased bandwidth.

#### VII. Management

- New England Telehealth Consortium is a 501(c) 4 non-profit corporation. The principal purpose of the corporation is to create a consortium of healthcare providers for the purpose of designing and implementing a private broadband regional telehealth network with Internet2 connectivity; to link regional healthcare providers with urban public practices, research institutions, academic institutions, and medical specialists to provide greater efficiency in the sharing of information relevant to healthcare applications; to provide a shared broadband network with healthcare providers thereby increasing and validating telehealth and telemedicine opportunities in the region; to provide healthcare providers in rural areas with greater and easier access to current research, advances in medicine, expert support and team consults; to allow healthcare providers in the region access to a common network for provision of electronic health records, remote medical diagnostics, telehealth, telemedicine, population health database, remote surgery, teledentistry, telepsychiatry and behavioral health treatment.
- NETC management costs are funded by member dues as set annually by the NETC Board of Directors.

10. Provide detail on how the supported network has advanced telemedicine benefits:

**At present, NETC is unable to advance any benefits. The initial scoping document and resulting bid process did not meet USAC approval. NETC revised its scoping document, received USAC approval, and it was posted. NETC Executive Committee members reviewed proposals received by the October 22, 2009 proposal submission deadline. Documentation was prepared and a 466-A and related materials were submitted to USAC. On January 21, 2010, USAC issued NETC its first Funding Commitment Letter (FCL). Subsequently, NETC submitted a letter of intent and a form 467 on January 26, 2010. NETC received the Health Care Provider Support Acknowledgement Letter (SAL) and began work on the Network Design. The Network design was completed in June 2010. NETC Executive Committee, Board of Directors, and management have drafted scoping documents to build and manage the network. NETC submitted its site list, RFPs and related documents for USAC pre-review in October 2010 and uploaded its 465 and 465 Attachments for RFPs 01 & 02 on January 20, 2011, to the RHCPP SharePoint site. USAC posted the NETC RFPs to its public site on January 25, 2011. At this time, NETC is in the 28 day public notice period which will close on February 23, 2011, at which time NETC will begin evaluating the proposals received. Due to the delays experienced with the complex and cumbersome USAC process, NETC has filed a six months extension request with the FCC and that request is currently under FCC review. Should the extension request be denied, NETC faces significant challenges to completing its work and submitting funding requests for network build and management to USAC by the June 30, 2011 deadline.**

**NETC staff and management have invested many thousands of hours into procuring and administering the NETC project, none of those costs are or have been eligible for RHCPP funding. To date, NETC members have expended over \$1,000,000 in administrative costs and have yet to receive any tangible benefit. The processes set up by the FCC and USAC for the Rural Health Care Pilot Project must be streamlined.**

a. Explain how the supported network has achieved the goals and objectives outlined in selected participant's Pilot Program application;

**"None achieved to date."**

b. Explain how the supported network has brought the benefits of innovative telehealth and, in particular, telemedicine services to those areas of the country where the need for those benefits is most acute;

**"No benefits to date, only excessive administrative costs which may or may not lead to benefits for areas most in need."**

c. Explain how the supported network has allowed patients access to critically needed medical specialists in a variety of practices without leaving their homes or communities;

**"No access provided to date."**

d. Explain how the supported network has allowed health care providers access to government research institutions, and/or academic, public, and private health care institutions that are repositories of medical expertise and information;

**"No access provided to date."**

e. Explain how the supported network has allowed health care professional to monitor critically ill patients at multiple locations around the clock, provide access to advanced applications in continuing education and research, and/or enhanced the health care community's ability to provide a rapid and coordinated response in the event of a national crisis.

**"No such benefits to date."**

11. Provide detail on how the supported network has complied with HHS health IT initiatives:

**The New England Telehealth Consortium anticipates complying with HHS health IT initiatives, however, since the network has not yet been built, this has not occurred.**

a. Explain how the supported network has used health IT systems and products that meet interoperability standards recognized by the HHS Secretary;

**"To Be Determined"**

b. Explain how the supported network has used health IT products certified by the Certification Commission for Healthcare Information Technology;

**“To Be Determined”**

c. Explain how the supported network has supported the Nationwide Health Information Network (NHIN) architecture by coordinating activities with organizations performing NHIN trial implementations;

**“To Be Determined”**

d. Explain how the supported network has used resources available at HHS’s Agency for Healthcare Research and Quality (AHRQ) National Resource Center for Health Information Technology;

**“To Be Determined”**

e. Explain how the selected participant has educated themselves concerning the Pandemic and All Hazards Preparedness Act and coordinated with the HHS Assistant Secretary for Public Response as a resource for telehealth inventory and for the implementation of other preparedness and response initiatives; and

**“To Be Determined”**

f. Explain how the supported network has used resources available through HHS’s Centers for Disease Control and Prevention (CDC) Public Health Information Network (PHIN) to facilitate interoperability with public health and emergency organizations.

**“To Be Determined”**

12. Explain how the selected participants coordinated in the use of their health care networks with the Department of Health and Human Services (HHS) and, in particular, with its Centers for Disease Control and Prevention (CDC) in instances of national, regional, or local public health emergencies (*e.g.*, pandemics, bioterrorism). In such instances, where feasible, explain how selected participants provided access to their supported networks to HHS, including CDC, and other public health officials.

**Services have not yet been selected, so no coordination has yet occurred.**
