

The 87.7 'Franken' FM's have clearly been operating commercial radio stations without compliance with FCC regulation concerning overmodulation, sponsor identification, EAS and controls on political advertising. Public files for these stations do not exist. Members of public wishing to contact licensees are unable to do so; all calls are routed to the lessee of the airtime, not the 'licensee' of the station. FCC inspections of these facilities AS RADIO STATIONS are not conducted. On these issues alone, leaving alone the issue of interference with non-coms in that bandspace, these stations should be shut down immediately.
