Re: Preserving the Open Internet, GN Docket No. 09-191; Broadband Industry Practices, WC Docket No. 07-52;
Framework for Broadband Internet Service, GN Docket No. 10-47

The INTERNET

enlarges the social network;
expands & deepens markets; and
has the potential to heighten consciousness.

But all of this can only take place if the social compact rests equally between us all. No one person or entity should have a greater control of space, time, access and content.

The PIPES should remain equally accessible as communications channels for all.
