Re: *Video Device Competition, MB Docket No. 10-91; Commercial Availability of Navigation Devices, CS Docket No. 97-80; Compatibility Between Cable Systems and Consumer Electronics Equipment, PP Docket No. 00-67*

Dear Ms. Dortch:

On March 29, 2011, Kevin Leddy, Andrew Long, and Cristina Pauzé of Time Warner Cable Inc. (“TWC”), together with the undersigned, met with William Lake, Steve Broeckert, Michelle Carey, Lyle Elder, Mary Beth Murphy, Nancy Murphy, Brendan Murray, and Alison Neplokh of the Media Bureau to discuss the Bureau’s “AllVid” proposal. We explained TWC’s strong interest in ensuring that its subscribers can access video programming on any device, including not only televisions but PCs, tablets, and smart phones. We also stressed the importance of ensuring that measures intended to promote the commercial availability of navigation devices do not impede innovation or result in the disaggregation of an MVPD’s services. We noted that, although the burgeoning video marketplace obviates the need for any further regulatory action to promote the goals set forth in Section 629 of the Act, an approach that relies on application program interfaces (“APIs”) to enable consumer electronics devices to access an Internet Protocol version of an MVPD’s service should present fewer concerns than many alternatives proposed in the above-captioned proceedings, provided MVPDs would retain flexibility with respect to the standards and protocols contained in such APIs. We also encouraged the Bureau to consider whether the lease-versus-buy value proposition has a greater impact on retail availability than technology issues.
