

to the FCC

ive been a t-mobile customer for a little over a year... and coming from at&t i never thought i would be pushed back to that company....

i believe that if this merger is pass not only would it take away any competition for the GSM phone market and allow ATT to charge outragous amounts

for there phone and service but it will impact our ever so delicate economy! think of all the jobs that will be lost if this is passed

will at&t supply the customers that are on tmobile with new phones? most likely NOT as that being said there networks are NOT compatable so we would be forced to buy a phone... and im sure many of us dont want to switch back and forth from tmobile to ATT and then to another carrier

this is a outright BAD idea and should have been addressed with more understanding from the economic stand point and a customers stand point....

putting aside the fact that AT&T charges almost double what im paying through tmobile (for two unlimited lines)

there customer serivce almost NEVER helps you

and the fact that they cant compete with tmobile so they want to "merge" with them makes this a snow ball effect for anyone that is a current or going to be a customer through tmobile

I VOTE NO!

dont let this happen!

think about all of the facts that are brought your your attention and realize THERE IS NO GOOD OUTCOME!

too many people will lose there jobs/laid off  
and what benifit?

thanks for taking the time to hear our side of the story and i hope all of this helps you make the RIGHT choice and stop this merger!

from a loyal tmobile customer!
