Three additional sites were added to equate to the 456 Attachment report. They are Greater Erie Niagara Surgery, Hillside Family Medicine and Digestive Diseases and Saint Vincent Regional Imaging Center.

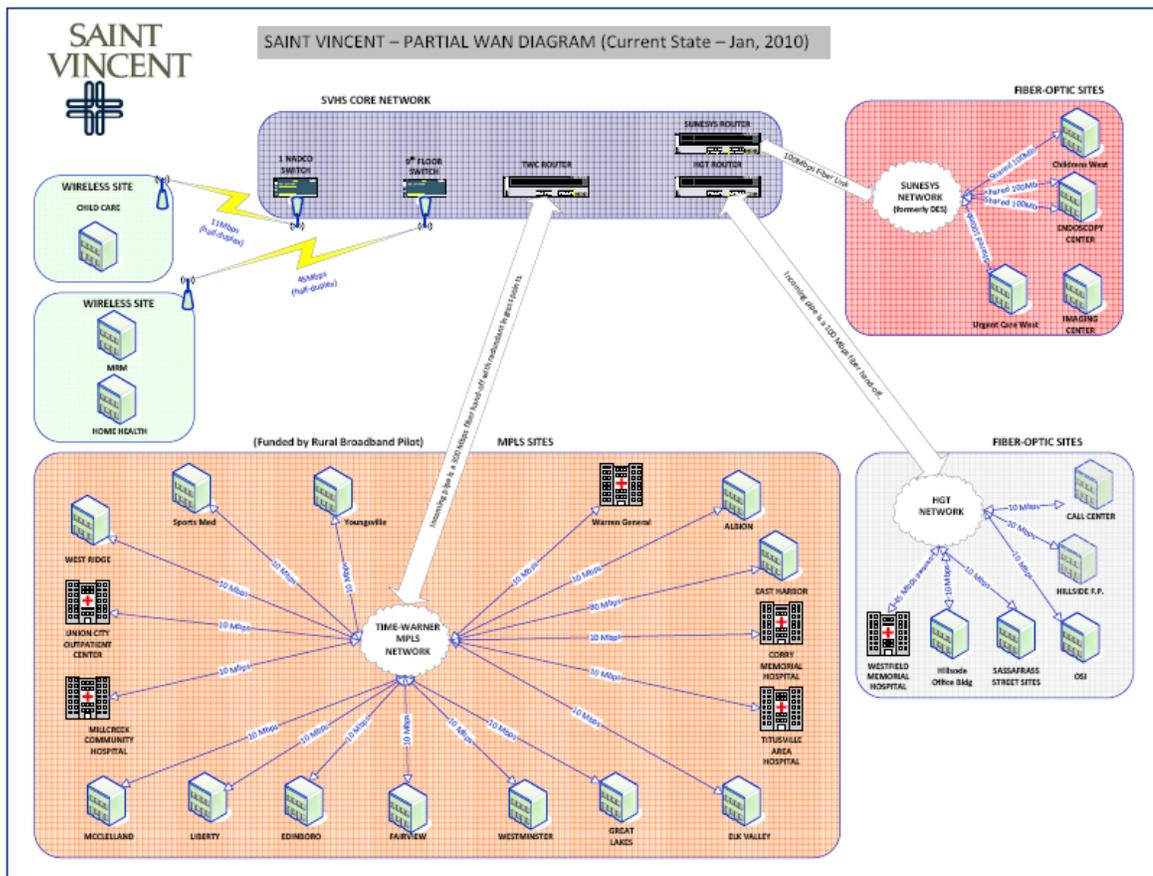

3. Network Narrative:

This project completed its competitive bidding process and awarded bids to two vendors in March 2009. The selected vendors included a large telecommunications provider to provide the connectivity between the NEHN Sites and Saint Vincent Health Center and a bid was also awarded on a self-provisioning basis to Saint Vincent Health Center-Information Technology Networking Services. (SVHC-ITNS) SVHC-ITNS will provide the internal network infrastructure, network monitoring and administration for the NEHN Network. The Saint Vincent Health Center and NEHN member sites are networked via a 300MB MPLS fiber connection from which member sites attach at either 10 Mbps or 80 Mbps (1 site – East Harbor; higher bandwidth required due to radiologic image sharing).

The NEHN completed it's 466 A package and received funding commitment letters from USAC to begin the initial deployment of broadband to the year 1 and year 2 sites. In addition, a year 3 site located at Westminster Family Medicine was approved for funding commitment in 2010 and the Regional Cancer Center site has been submitted for funding approval in December of 2010.

6. Describe how costs have been apportioned and the sources of the funds to pay them:

Saint Vincent Health Center, as Lead Entity, is funding the 15% matching funds from their operating expense budget.

7. Identify any technical or non-technical requirements or procedures necessary for ineligible entities to connect to the participant’s network.

At the present time, there are no ineligible entities projected to be part of the NEHN.

8. Provide an update on the project management plan:

Project Management is provided by the Information Technology Department at Saint Vincent Health Center. The former project coordinator, Robin Stursa, left the organization as of March 1, 2010. Michelle Wieczorek was appointed to the project coordinator role by the CEO of Saint Vincent Health Center. Steve Gary, Senior Vice President and CFO was appointed the Associate Project Coordinator. Due to transition within the Saint Vincent Health Center, CEO Scott Whalen announced that Richard Ong, Vice President and CIO and Jeannette Haras, IT Financial Applications Manager named as Project Coordinator and Associate Project Coordinator, respectively. This was documented and shared with USAC on January 17, 2011.

NEHN continues to phase in its network deployment plan with the assistance of Time Warner Cable and SVHC-ITNS. The Regional Cancer Center (RCC) location is now connected.

9. Provide detail on whether network is or will become self sustaining. Selected participants should provide an explanation of how network is self sustaining.

It is anticipated that this network will be become self-sustaining and be funded by the Saint Vincent Health Center at the termination of the pilot program. The new recurring costs for the Northeast HealthNet are projected at approximately \$235,800 which reflects annual costs for connected sites (see section 4). This will be viewed as a cost of doing-business for the Health Center and become incorporated into the Operating Budget upon conclusion of the FCC Grant.

Furthermore, it is anticipated that the expanded connectivity in the region will enable the development of new products and services in the telehealth arena to be realized. As reimbursement for telemedicine modalities improves, so does the viability of advanced telemedicine service offerings and thus the ability to cover the cost of the fiber optic connections to the rural partners in our program.

10. Provide detail on how the supported network has advanced telemedicine benefits:

The Regional Telemedicine Network (RTN- a newly established non-profit entity of the Saint Vincent Health System) is leading the telemedicine initiatives for Saint Vincent Health System. Recently, additional connectivity to and from Westminster, Regional Cancer Center and the Saint Vincent Health Center allows for access to electronic medical records. The NEHN provides the supportive infrastructure including fiberoptic broadband connectivity between the NEHN member organizations. Regional support of the RTN is being garnered through presentations to the medical community. Due to the competitive nature of the information contained in the RTN business plan, if requested by the FCC, a confidential copy of the plan will be provided under separate cover.

All Saint Vincent Medical Group (SVMG) practices connected to the NEHN are now utilizing fiberoptic connectivity to support their Allscripts EMR implementation. Physician adoption of and satisfaction with the EMR was dependent upon a high-speed internet connection in order to decrease latency and screen flip time. Furthermore, this connectivity allows for enhanced functionality for a proposed, upcoming patient portal due later in CY2011.

11. Provide detail on how the supported network has complied with HHS health IT initiatives:

The supported network helps to provide needed framework as NEHN furthers its Meaningful Use requirements, telehealth and regional health information organization (through health information exchange) initiatives as prescribed by CMS and supported by HHS.

12. Explain how the selected participants coordinated in the use of their health care networks with the Department of Health and Human Services (HHS) and, in

particular, with its Centers for Disease Control and Prevention (CDC) in instances of national, regional, or local public health emergencies (e.g., pandemics, bioterrorism). In such instances, where feasible, explain how selected participants provided access to their supported networks to HHS, including CDC, and other public health officials.

In July 2002, Saint Vincent Health System signed a memorandum of understanding with the U.S. Department of Health and Human Services to serve as the sponsor of a Pennsylvania DMAT. Saint Vincent has agreed to:

- Recruit, organize, train and maintain a Disaster Medical Assistance Team, designated as “PA-3” in accordance with NDMS guidelines
- Periodically verify that credentials of all team members who are subject to state licensure/certification/registration requirements are current and valid (e.g., physicians, nurses, pharmacists, dietitians, nutritionists, EMTs, paramedics, etc.)
- Accept, maintain and safeguard equipment from federal and other sources for use in training and disaster response
- Appoint an individual from the team to serve as the point of contact for NDMS/DMAT administration and personnel paperwork
- Mobilize the team for state, regional, or local disaster service, as appropriate
- Release the team to PHS for federal disaster service when requested by PHS

Consistent with the sponsorship of the DMAT and in the spirit of ongoing cooperation with the Department of Health and Human Services, NEHN would grant access to the network in the case of any local, regional or national crisis.

In addition to the DMAT participation, Saint Vincent also contributes data to the bioterror-surveillance system managed by the University of Pittsburgh Medical Center which is a cooperative research project managed by the Centers for Disease Control and the Pennsylvania Department of Health. If deemed necessary and appropriate, NEHN would grant access to the network to facilitate exchange of data in the event of a bioterror event or any pandemic or public health crisis.
