

The whole reason Bell got split up is because of this monopolistic buyout practice they always try to do. This is what Microsoft got sued for by the government. Bell got split up into baby Bells, which one of them are AT&T, and now AT&T is trying to become Bell 2.0. This is not good! Another monopoly is not what we need. AT&T are already controlling most of America's Internet and Cellphone and some of its TV subscribers, do not, I repeat, do not let them take control over our digital lives by becoming a monopoly again. I refuse to let AT&T become the monopoly it once was. Did you know, in the early 1900's, AT&T, when it was a monopoly, invented the floppy drive prototype but hid it away for fear it would damage their business and control over what kind of telephone equipment people used. They didn't let AT&T subscribers use any other equipment but AT&T's. Do not allow AT&T to become a monopoly again and restrict innovation, competition, and freedom, or else we shall lose it all.
