

This monopolizing deal should certainly be blocked!

1. T-Mobile and AT&T were the only GSM operators in the United States.
2. T-Mobile offers "disruptive" services like UMA (Wifi Calling) which can help consumers and Global connectivity as well. AT&T will probably cancel this service.
3. T-Mobile was priced almost 50% below AT&T for comparable service. This means AT&T is buying the competition and forcing prices up.
4. T-Mobile was consistently the best customer service mobile operator in the USA. AT&T is hated. This is just AT&T removing them from the playing field.
