FCC:

I am writing to object to the acquisition of T-Mobile by AT&T. If this goes through it will allow one company to have an undue advantage over the other remaining companies. It's a known fact that AT&T has notoriously bad customer service. But the biggest problem with this merger is that it will allow one company to control the majority of the communications in this country, driving up prices and doing what it pleases. If we wanted one telecom company we would have kept Ma Bell, wouldn't have we?

I am totally against this move (and have written President Obama to say so). Please do not allow this merger.
