WIRELESS TELECOMMUNICATIONS BUREAU SEEKS COMMENT ON AMOCO CHEMICAL COMPANY REQUEST FOR WAIVER TO USE 900 MHZ BAND ITINERANT USE CHANNELS FOR A PRIVATE LAND MOBILE RADIO SYSTEM

WT Docket No. 11-77

Comment Date: May 25, 2011

Reply Comment Date: May 31, 2011

On June 9, 2010, Amoco Chemical Company (Amoco) submitted a request for waiver to permit it to utilize 896-901/935-940 MHz (900 MHz) band itinerant use channels in the private land mobile radio system for its plant in Texas City, Texas.¹ Four 900 MHz band frequency pairs have been designated for operations at unspecified locations for varying periods of time (itinerant use).² Amoco seeks to add three of those frequency pairs to its license for 900 MHz Industrial/Land Transportation Station WPAH364.³

Amoco is engaged in the processing and creation of chemical products from petroleum products. It states that the purpose of the proposed channel expansion is to eliminate channel congestion and provide more reliable communications on the existing system for the chemical plant, adjoining refinery, and waterways that serve as Amoco's terminal port.⁴ Amoco's frequency coordinator states that no other 900 MHz band frequencies are available in the vicinity.⁵ We seek comment on the waiver request.

Procedural matters

Comments on the request are due **no later than May 25, 2011**. Reply comments are due **no later than May 31, 2011**. All filings should reference the docket number of this proceeding WT 11-77.

This proceeding has been designated as a "permit-but-disclose" proceeding in accordance with the

² See Private Land Mobile Radio Services – 900 MHz Band Itinerant Use Channels, *Public Notice*, 16 FCC Rcd 14871 (WTB PSPWD 2001).

³ Specifically, frequency pairs 897/936.6625 MHz, 900/939.9750 MHz, and 900/939.9875 MHz. Amoco notes that it already is authorized to use frequency pair 897/936.6625 MHz at the Texas City facility under Call Sign WPLV745. See Waiver Request at 1. We note that the present application seeks authorization to operate on that frequency pair with much higher power.

⁴ *Id.* Amoco contends that "the recent expansions of operations at Texas City as well as scheduled construction and maintenance activities have increased the system load to a burdensome extent necessitating this system upgrade and expansion." *Id.*
