

This merger should not be allowed to happen. It will give AT&T an unfair monopoly on the GSM mobile network in America. The reason are cell phone bills are so much higher then almost every other country out there is lack of competition. Nobody can get into the market because the big dogs don't like letting competition in the door. If this happens it will only make prices and service worse for everyone. Understand that competition in these markets is a good thing and we should promote it. All in all we should not be handing AT&T another monopoly opportunity.
