

Judge Green dismantling of the old Bell System monopoly during the 80s was long overdue and allowed residential and commercial users greater choices, better products, and improved service at a lower cost. If you allow AT&T's takeover of T-Mobile you will rebuild that monopoly and stifle choice and innovation in the market, harm consumers, and lead to higher prices and fewer jobs nationwide. Don't let AT&T put our mobile future at risk. Please stand with me and reject such reckless consolidation of the mobile industry.
