The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Mary Gerber

AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Rita Morris

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Why do we have anti-trust laws in the first place? The AT&T takeover of T-Mobile is exactly the situation they were enacted to prevent! A duopoly is only an inch away from a monopoly! Why do we have a Federal Communications Commission in the first place? This is the Commissioners' chance to fulfill their duty to the Public! Let them do their duty or resign! The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Chris Koeritz

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Jon Kirkpatrick

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Aaron Feinberg

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What is more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it DOES NOT like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Keith Carlton

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

As a T-Mobile customer of many years, I will be switching to CREDO the moment AT&T takes over. This continuing monopolization of necessary utilities is NOT ACCEPTABLE. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Mark Schafer

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's proposal to take over T-Mobile is bad news for consumers, and a fine example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service, with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile would appear to directly counter to this mandate. The proposed takeover would lead to higher prices, significantly reduce choice, and stifle innovation in the marketplace. In addition, the continued consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T has a history censoring content and blocking phone features it doesn't like, which will only be amplified with the removal of T-Mobile, the third largest player in the current market. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users, not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

To the Federal Communications Commission,

How many more 'too Big to Fail' corporations do we need? The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Richard Oxhandler

I'm old enough to remember the Bell System divestiture, and the huge innovations and improvements that came from that. Allowing a single company to "own" as much of the market as this merger will give AT&T control over places them in violation of antitrust laws. It will once again stifle innovation and allow one company to control available choices for a majority of consumers, as well as limiting access to any applications and functionalities that AT&T does not like.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Andrea Masom

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I object to the reduction of competition within our cellular providers that will happen AGAIN if the merger of AT&T and T-Mobile is allowed to go forward. WE LOST ALLTEL (to Verizon) which was rated high in quality of customer service and quality of signal. We need more competition and should force AT&T and Verizon to break up! You can stop the erosion of our cellular competition by BLOCKING THE MERGER OF AT&T and T-MOBILE! I do not see having 3 big cellular providers as a picture of competition. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Heather McCrillis

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). This country's ANTI-TRUST laws must be enforced!! Big business take overs are not in the interest of consumers. They take away our choices and our freedoms to receive goods and services that ensure our freedoms and rights to get truths as opposed to controlled information that we are seeing so much of today. Take overs of the airways that are owned by the citizens of this country and allowed to be controlled by granting licenses to monopolies runs contrary to the ideals of this democracy. I am a T-Mobile customer by choice and am glad to be afforded the choice of carriers. I am very opposed to AT&T's take over of this company. Several years ago our government broke up the monopoly of MA BELL. With this merger we are simply going back to monopolies. Many things that AT&T does are objectionable to me. This approved takeover would give me less choices It would allow too much control to large corporate entities to control our government. There is too much corporate interjection into our government now. Give this government back to the people and take it away from the growing control of big corporations!! The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Derrick Buttchen

The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Bonnie Rukin

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Susan Zimmerman

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). I have carefully chosen to be a T-Mobile customer instead of an AT&T customer for a number of reasons that are very important to me. AT&T's prices have always been higher, and they were the leaders in jacking up the price on flat-rate data plans, which is bad for consumer freedom and also for the growth of the mobile app economy. AT&T has also been outspokenly opposed to network neutrality, which is also critical for consumer freedom and the mobile app marketplace. Since I want the freedom of selecting the phone of my choice without requiring the permission of my service provider, I am constrained to stay with a GSM service provider. Up until now, I have had the choice between two GSM providers in the US, but this merger would eliminate that choice and force me to become an AT&T customer against my will if I wanted to retain my current freedom of choice in selecting my next phone. This proposed merger would result in a huge reduction in consumer choice. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Washington, DC 20554

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Barbara Condon

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Gretchen Brewer

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Josh Harris

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Tom Johnson

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Josh Eisen

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Let's face facts. AT&T has, by far, the worst track record when it comes to consumer satisfaction and somehow also has the highest prices for service in the country. Giving AT&T more of a monopoly will only exacerbate the problem further. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Patrick Matheny

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Nina Aronoff

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. Already the market for fixed wire-line based broadband connections is already a duopoly of big cable and phone companies and has gotten bigger with the approved Qwest Century Link merger. When big service providers get to merge with other service providers or with content providers as Comcast did with NBCU it changes their business incentives – service providers that own content develop a conflict of interest to discriminate against content they don't own. We need open, universal access to communications technologies like broadband and the National Broadband Plan should have addressed competition and pricing issues. The FCC does not need to mandate price control rules it merely needs to mandate increased competition and in a more competitive market we will have lower prices and better service naturally develop. We need statutory Network Neutrality rules of nondiscrimination applied to both fixed and wireless providers of high speed Internet services or broadband. The market for dial-up may still be very competitive but broadband which the country needs to move to is anti competitive. AT&T has enough spectrum already their problem is they don't invest sufficiently enough in upgrading their network infrastructure. With this merger AT&T would have a monopoly on GSM cellular phone services. and a duopoly on mobile broadband can develop. I also oppose President Obama's National Wireless Initiative to auction off public spectrum to companies like AT&T, Verizon Wireless, etc without Network Neutrality rules to ensure the Net remains a level playing field. I reject the development of an unequal two-tiered Internet with a slow public lane for those who can't afford to pay extortion tolls or choose not to and a fast lane for the rich. These companies when accepting public spectrum or when accepting taxpayer subsidized public sources of funding to expand broadband deployment must be required to comply with public interest requirements. AT&T's data caps unfairly exempt their own online services from competition. The Net must remain a level playing field where anyone can compete, innovate and win or lose on the merits – ISPs cannot cherry pick winners and losers or noncommercial, independent voices can get squeezed out. Even with conditions this merger is very disastrous for users, innovators and the future of the Internet as an open platform. Some suggest maintaining Net Neutrality for wire-line broadband services but exempting wireless I think that is unacceptable. We need free flow of information, communication and commerce to be able to continue. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Rogelio Esparza

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Vic Goodman

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

19th. May, 2011 We urge the FCC not to permit the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T has a history of censoring content and blocking phone features it doesn't like, and during the 8 Bush years it was AT&T which assisted that administration with spying on Americans...! ... needless to say AT&T should have been prosecuted, held accountable, and indicted... which never happened despite citizens demand for it!!! AT&T cannot be trusted. A potential duopoly between AT&T and Verizon would only invite further increased abuse of power and must be prevented to occur at all cost. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. Therefore, my family and I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. Thank you.

Sincerely,

Petra Gampper

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Don Malone

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). We have so little choice where I live now that it is crazy. The few providers here all have the same charges with minor differences in plans (e.g. rollover minutes versus mobile to mobile free). We don't need to limit competition, but to enhance it. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Tina Ringle

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

We're counting on the FCC's integrity to stop the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). It's devastating for consumers if AT&T's \$39 billion dollar proposal to take over T-Mobile gets approved—a perfect example of what our anti-trust laws were implemented to prevent! If the proposal is approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Doris Fisher

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Desaree Bland

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Casey clark

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). I've been a consumer of other ATT services and they have been horrible. After dropping their coverage I have been billed for long distance service I never used and hectorred from India. Dealing with their consumer relations is a nightmare. As a current T Mobile cell phone user, the thought of ATT taking over is most unpleasant. We need more competition not less. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Christine Murphy

I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. Now let me add my own letter. Don't worry, it's short: Gentlemen: If there is still any remaining question regarding the adverse impact of a take-over of T-Mobile by AT&T, you need to look no further than the precursors to the most recent spate of television advertisements by T-Mobile. The current ads show a young woman asking, "What's going on here?" while a man is being turned upside down and having his pockets emptied by two large, thuggish men. His reply runs something akin to, "It's my monthly mugging by my current service." The same set of ads were run just a few months ago, involving the same actors with a similar script. The only difference then was that the man being mugged said that his carrier, the one mugging him, was AT&T! So, are we to believe that the acquisition by AT&T of its toughest competitor will stop the mugging of the American public? That position insults our intelligence. T-Mobile, through its ad campaign, either was portraying a truth or telling a lie. Pick one. If T-Mobile lied, fine them and, as punishment, make them stand on their own two feet, without AT&T's money. If T-Mobile spoke the truth, slap AT&T for even bringing up the subject. Have AT&T come up with their own solutions to their coverage problems, rather than buy them. And please, don't give into any of that nonsense about market efficiencies that benefit the public. For years now politicians (mostly Republicans - I know, I was one) have yammered on about the free market and the beneficial consequences of competition. This acquisition proposal is antithetical to that competitive spirit. It is un-American. Sincerely, Gregory Barton

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I currently have T-Mobile and chose this service over the company's like AT&T. The government broke up SBC and the other regional phone companies which were not even close to the size of AT&T. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Mark Stukey

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Jason Bechard

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Brad Belden

What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Mary Kipling

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Kevin Parnell

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

William Rivers

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I urge the FCC, with most sincere emotion, to stop the AT&T takeover of T-Mobile. The market should be about choice- it's the only way to ensure fair prices for consumers. You are supposed to be a government FOR THE PEOPLE. That's means everyone, not just the people with money and cupcakes. I ask with all my heart that you listen to the people you are supposed to serve, let us keep our options open, and honest.

Sincerely,

Sarah Regalado

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Anne McKeithen

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Susan Ricci

AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Gregory Trupiano

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Hank Marzuchowski

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

John Cielukowski

To the Federal Communications Commission,

I know I live in a country where oligarchies rule all. We used to have laws to prevent this from happening. I think we still do but so many officials no longer have the public interest. Please think of all the people that will have no choice but to pay outrageous charges to these bloodsuckers if AT&T takes over T-Mobile. In other words, grow a pair!! The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

FCC is not exactly in the good graces of the public after this latest industry-revolving door scandal with Commissioner Meredith Attwell Baker's going to work for Comcast 4 short months after voting to approve their very controversial merger with NBC. It simply STINKS. FCC is supposed to protect the interests of the general public. That has NOT been happening . The consolidation of our communications industry into larger and less competitive behemoths as permitted by YOUR AGENCY is NOT in the interest of the public! The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Last fall I at last succeeded in getting AT&T out of my life when I signed up for a far better phone service which costs a fraction of AT&T's rather poor yet highly expensive one, for me as a Senion. The thought that they might be allowed to absorb T-Mobile bothers me because I have a T-Mobile "go" phone that requires no contract. Please don't let AT&T become another of our "Too big to Succeed" corporations (Again!). The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Donna Guardino

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

This merger is NOT in the public interest. This is another example of media & communication consolidation that favors money, power, & control, rather than competition and fairness. This is another example of the corporate dominance of American life & politics. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Hilary Back

AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Jennifer Conneely

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Glenda Derbyshire

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Carol San

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Greg Wooster

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

John Carroll

Washington, DC 20554

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Robert Pann

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Paul Boucher
