The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

On behalf of the public, I ask you to not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's proposal is bad news for consumers. It is a perfect example of what our anti-trust laws, dating back to President Theodore Roosevelt, were designed to prevent. The FCC itself has said, "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." The proposed takeover would lead to higher prices, stifle choice and innovation in the marketplace, and consolidation of media and telecom hurt our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable.. An AT&T takeover will hurt all mobile phone users. Again, I urge the FCC to block this takeover and protect competition in mobile phone services. Sincerely, Margaret Peters 1312 Princeton Drive Dayton, Ohio 45406

AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Nancy Zeltsman

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Beverley Cantu

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Adam Walters

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Susan Walsh

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Per Bluhm

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. at & t is not a fair player and if this corporation is allowed to buy T-Mobile, it will be all the worse for the average American citizen. I thought this country was about choice. This takeover would be the epitome of the absence of choice. We are truly becoming a nation of corporations, of governments that don't care about the people.

Sincerely,

Susan Weldon

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Richard McKinney

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Don Romer

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Simon Mayerhofer

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Joe Earnshaw

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Pat Allen

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Timothy Coleman

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Susan Balaban

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). In this the age of the Internet telecommunications companies are desperate to maintain control over how people communicate in order to keep control over their money. It will be far easier for AT&T to hinder technology and force people to accept the communications technology that AT&T supports/controls if AT&T has more monopoly power over the market. Support the advance of science and technology by refusing to allow AT&T to take over T-mobile. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I was a loyal customer of Voice-Stream until it was purchased by T-Mobile. Since then, I have remained extremely satisfied with the quality of service I have received from the company. Having dealt with AT&T in the past, I immediately called T-Mobile, asking how much it would cost to cancel my contracts with them. Although the cost was prohibitive, I was also told that the process could take enough time for my contractual obligation to expire (and if the purchase were approved, AT&T would likely require me to switch to one of their plans, freeing me from any contractual obligations. Although my (financial) concerns were placated by this conversations, I like dealing with T-Mobile. I have never had an interaction with AT&T that indicated that if "customer service" appeared in their training, it was as a footnote under maximizing shareholder profits. I work in retail. In my job, the only thing that takes precedence over customer service is safety (by a slim margin). "Maximizing shareholder profits" is (at best) a distant third. In short: I like dealing with T-mobile (even though their store is almost double the distance from me as AT&T).. If AT&T purchases T-Mobile, it will be an inconvenience for AT&T. and a disaster for T-Mobile customers like myself.

Sincerely,

Washington, DC 20554

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Tony Camuti

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's proposal to take over T-Mobile is very bad news for consumers, a perfect example of what our anti-trust laws are supposed to prevent. AT&T has a history of stifling the offering of competitive features. It has also acted to censor content. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T's history runs counter to these public needs. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

To the Federal Communications Commission,

I am asking you the FCC to prevent this merger from going through as I will personally be affected by this, as I am a T-mobile customer. I do not want this merger to go through, 1) because my cellphone bill WILL go up and 2) we need competition in the open market in order for the MARKET to actually work and keep customer's prices down. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Rodney Wolf

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Gretchen Stoehr

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

James Broussard

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I'm a T-Mobile customer and I feel strongly that T-Mobile should not be taken over by AT&T. Our country thrives on competition among businesses—that's the American way. We don't want monopolies taking over. I will not stay with T-Mobile and my family members say they dislike AT&T and just want an excuse to bail. An AT&T monopoly will be that excuse. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Lynne Marino

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I am writing to strongly state that the FCC should not agree to the takeover of control of T-Mobile by AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. I do not like that this takeover would result in only 2 large companies controlling more than 75% of the market. This does not allow for needed choices in cell phone companies by consumers. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Sheralyn Kaplan

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. In the best interests of research, technology, and innovation, we need to be more realistic as a society on the threshold between what is just the temptation for profit and true, meaningful progress.

Sincerely,

Colin Tooker

The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Michael Baughn

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

THIS IS NOT IN THE BEST INTERESTS OF THE PUBLIC, CONSUMERS, OR GOOD BUSINESS. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Marjorie Weinstein

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Wendy Kolanz

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. Wasn't Bell Telephone broken up some years ago because it held a monopoly? The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. Or does the fact that AT&T is in the back pockets of Congress have something to do with the proposed takeover? And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Nancy Quittmeyer

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of licenses and authorizations currently held by T-Mobile to AT&T (Docket No. 11-65). AT&T's proposal to take over T-Mobile is bad news for consumers and a perfect example of what our anti-trust laws are supposed to prevent. Approval will create a virtual duopoly for mobile phone service in which AT&T and Verizon will dominate the market with an 80% share between them. The FCC's strategic plan sets out its role as a defender of competition when it states, "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to the commission's own mandate. Without doubt, this takeover will lead to higher prices, stifle consumer choice and suppress innovation in the marketplace. What's more, consolidation of media and telecom hurts consumer's ability to access information needed by citizens in order to participate fully in our democracy and to attend to our government's accountability, particularly given that AT&T has a history of censoring content and blocking phone features. If AT&T is allowed to take over T-Mobile all mobile phone users will ultimately suffer – not just T-Mobile customers. In the strongest possible terms, I urge the FCC to protect competition in mobile phone services and block this takeover.

Sincerely,

Steven Smith

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Monopolies were once outlawed in this country, the country we still hope to make into a democracy. Too much power in one place. To allow AT&T to gobble up T-Mobile is not democratic. The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for me and every other consumer. Our anti-trust laws are supposed to prevent exactly this sort of sale. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." So says the FCC, yourself. Consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And our government is long overdue for accountability. If AT&T is allowed to take over T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Vera Mulnix

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Elizabeth Brown

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

John Konet

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Sarah Hubbs

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. As a T-mobil customer since 1999, I understand this firsthand; my phone bills with them have been consistantly more affordable than family and friends' phone bills with either AT&T or Verizon, and I'm Grandfathered in to a very reasonable minute plan. It concerns me that if AT&T takes over, that minute plan and all the good service that I've received with T-mobile will go out the window! The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. I, for one, don't want some company that's going to tell me what I can and can't say on the phone, and this trend would do just that; if I leave a voice message to someone, for example, in trying to resolve a disagreement, I don't want my voicemail cut off because either I or the person on the other end may have said something in the process that the phone company didn't agree with! Furthermore, it's none of their business, and their attempt to control our means of communication in such a way is unconstitutional and downright wrong! If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Stephanie Hammond

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Brigitte Bastrenta

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. What happened to the "rule of law"? The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Audrey Simpson

The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Joel Page

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Please to not allow the proposed transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). This proposal to take over T-Mobile is horrible news for consumers, and an example of what our anti-trust laws are supposed to prevent. If approved, AT&T and Verizon will 80% of the market. That does not sound like an arena for fair competition. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Roger Tracy

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Pamela Martin

AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Belia Portillo

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

My comment relates to the request by AT&T to have the FCC consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). I object very strongly to this aggrandizing move by AT&T. It is already a dominant force in the telecommunications industry, and its attempt to increase its present scope is a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history of censoring content and blocking phone features it doesn't like. Further, AT&T exercises massive leverage over the political process, with documented contributions to political candidates – a behavior which is contrary to the spirit and even the practice of true democracy. AT&T also demonstrated a cavalier disregard of its customers' rights to privacy of communications, by submitting without objection to the George W. Bush administration's widespread wiretapping activities, undertaken without appropriate court orders. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Christine Christian

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Patricia Coffey

If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Richard Miller

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Chris pelton

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Quintana

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). as a customer of T mobile I choose not to have AT&T. T Mobile has kept pricing affordable & has good customer service Unlike AT&T so if this goes through it will kill America's choice as Verizon already over charges for it's services. It will also mean a loss of jobs as AT&T will not keep all of T mobile employees. So bad for the job market AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Jeannine Bonstelle

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

Will this merger increase employment? Only for those with the task of firing "redundant" employees - then they'll be out of a job too... Will this merger increase competition and therefore benefit the American consumers by keeping prices reasonable or lower? No, it takes a competitor out of the marketplace, reducing competition which will inevitably lead to increased prices... Will this merger be beneficial to any American consumer? Not really. Those who stand to benefit are the ones with Golden Parachutes and large institutional holders of the stock. Will this merger improve the operation of AT&T? AT&T has the lowest customer satisfaction rating - maybe one day that will change, but right now their corporate culture is not one to be emulated or promulgated. Don't allow them to have a stranglehold on consumers! The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Robert Nies

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

I have been a T-Mobile customer for over 7 years and have been very happy with T-Mobile. I was an AT&T customer for 8 years and was not happy with them. They were the only landline phone service I could have, and because there was no competition, they had no incentive to improve their customer service or implement more competitive pricing. This proposed merger will lessen competition and put AT&T on its way to being a monopoly, just as it was throughout most of the 20th century. PLEASE DO NOT ALLOW THIS TO HAPPEN! The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. I want to stand up against that and state my opinion about AT&T policies. I would like to have more freedom of choice concerning my communication abilities. I strongly oppose the takeover of T-Mobile by AT&T. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Jo & Nick Giordano

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Paula Wegner

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Ben F. Garcia, Ph.D.-ABD

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

Ron Sullivan

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

P Devine

I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover. Last week, it was either CBS or ABC news that revealed that AT&T routinely overcharges its cellular and smart phone customers anywhere between 16% to over 300%. Couple this fact with the obvious anti-trust implications of such a merger, and it is bone obvious that the wireless phone using public, i.e. EVERYBODY, will be harmed, rather than helped, if you give your assent to such an unholy coupling. You cannot even begin to think of approving this monstrous assault on the American public. In fact, you owe it to your constituents to begin the process of breaking up AT&T yet again... Rather than further lining their already overflowing pockets.

RE: Proceeding 11-65, In the Matter of applications of ATT Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations.

To the Federal Communications Commission,

The FCC should not consent to the transfer of control of the licenses and authorizations held by T-Mobile to AT&T (Docket No. 11-65). AT&T's \$39 billion dollar proposal to take over T-Mobile is bad news for consumers, and a perfect example of what our anti-trust laws are supposed to prevent. If approved, there will be a virtual duopoly for mobile phone service – with AT&T and Verizon controlling 80% of the market. The FCC's own strategic plan sets out its role as a defender of competition stating "The competitive framework for communications services should foster innovation and offer consumers reliable, meaningful choice in affordable services." AT&T's proposed takeover of T-Mobile runs directly counter to this mandate. The proposed takeover would lead to higher prices and stifle choice and innovation in the marketplace. What's more, consolidation of media and telecom hurts our ability to access the information we need as citizens to fully participate in our democracy and hold our government accountable. And AT&T has a history censoring content and blocking phone features it doesn't like. If AT&T is allowed to takeover T-Mobile it will hurt all mobile phone users – not just T-Mobile customers. I urge the FCC in the strongest possible terms to protect competition in mobile phone services and block this takeover.

Sincerely,

William Thickstun
