RE: GN Docket 11-65

Dear Chairman Genachowski,

Broadband access is absolutely essential to every community and business in Wisconsin. The National Association for Advancement of Colored People (NAACP) – Waukesha Branch supports the proposed acquisition of T-Mobile by AT&T because of the far reaching impact it will have on connecting every resident of Wisconsin to high-speed Internet and innovative technologies.

President Obama has clearly defined his plans to bring every American citizen quality broadband access and this merger will help him achieve that goal. Thousands of new cell sites will become immediately available and more than 97 percent of Americans will have access to 4G LTE.

This means Wisconsin residents have additional employment opportunities, our students can use new technologies for research and education, and our businesses can expand their reach across city and state lines. This is what we need to keep pace in the 21st century.

I encourage you to support this merger and do everything you can to ensure every community and individual in Wisconsin is connected to high-speed Internet.

Sincerely,

Lillie Wilson
President
Waukesha County Branch NAACP
