

As a land Surveyor in Virginia I have relied on GPS for survey grade data for the last 15 years. This technology has been used for VDOT highway projects (I-66, I-95, I-395 , I-495 and HOT Lanes for both 495 and 95. I have relied on GPS for FHWA projects both parks and highways for over 100 projects. We use GPS every day for all projects. If GPS becomes unavailable or unreliable it will just about put us out of business. Our \$500,000 investment would become worthless. Please consider the above in your review. Thanks
