

GPS is the single most important advancement for safety in aviation since the invention of the jet engine, period! The investment by the aviation community is huge. To wipe out all the advancement aviation has produced by one ill-conceived, poorly vetted idea is incomprehensible. LightSquared proposed use of frequencies right next to the aviation GPS band is ludicrous. Your own testing has shown it to be very dangerous to the established systems now in service. Do not allow this to happen. It will wipe out an entire industry and jeopardize the safety of every airplane now flying with GPS navigation. Stop the Light Squared plan NOW!
