

We had a large Problem with this phone Scam. they would Call asking to verify our address for the yellow pages add. I had figured out there scam after i got screwed for over a year and not looking closer at our phone bill. Never thought much of it sense it we did a lot of phone calls. Till one day i decided to take a look. When i notice the back of the bill was showing a bunch of insane charges! I had no idea what they were for. They would use the phone book company trick with my employees. They would think why not? it's free advertisement or they are trying to upgrade our new address to the phone book. As they continue on saying yes to everything. They were signing up for something else not an advertisement add! They were racking up almost 180.00 in bogus charges from 5 diffrent company's! Luckily i was able to dispute many of the charges sense I was the owner of the phone not my Employees and i had never agreed to these charges my self. thou i was not able to recoup about 350.00 in charges cause one Company was really giving a hard time so i ended up loosing that charge.

FCC Needs to pay close attention to this! Also You need to also Look into Credit card processing Company's! Prime Examples are the Biggest Sam artist of them all. MBF leasing and Northern Lease. They Screwed me out of \$5,000.00! and i can't do a dang thing about it cause they are in New york and I'm in California,
