

AT&T / Bell Telephone is at it again! Years ago congress (and the FCC?) demanded that Bell should divest itself from it's huge communications monopoly. Well they are at it again; it's still the same "wolf" but with a new name, AT&T.

Please HALT the AT&T merger because consumers and the industries do best when we have choices. More companies means more competition in both pricing and in progress.

Just a few years ago AT&T had major control over the Internet in America. AT&T was huge and they owned most of the phone lines; AT&T had a strangle-hold in the Internet connection business with a very powerful monopoly. That monopoly crippled, if not killed Internet competitors!

Thankfully AT&T was forced by law to share it's phone lines with other companies. My AT&T Internet service cost me \$30 per month, but now I get the SAME peppy speed on the same lines with DSL Extreme for just under \$15!

If there is a merger what would prompt AT&T to do better in the cell phone business?

When there are only two major cellular providers it creates a bi-monopoly and that is never good for America!

STOP THE MERGER!

Thank you!

Anthony
