

Stop the sale of the 700 spectrum and use the next primary station frequency for PRIMARY use for EMS, First Responders, and have WS databases and WS devices

able to use it as well, where total infrastructure, comm's, electricity is out or system is so overwhelmed with people trying to get through transfer to other databases, and allow all to have outlets that are secure and verified..

Make it primary, a back up to down systems, and a place where information is not subject to intermittent use..

Use the spectrum wisely, once sold it is gone forever.

Make WS and WS devices able to use 3 settings.

Thank you for your consideration, i hope we can do this for the US and globally.
