

Regarding IB Docket No. 11-109

August 9, 2011

Marlene Dortch
Federal Communications Commission
445 12th St. SW
Washington, DC 20554

Dear Marlene Dortch,

Technology will never cease to grow and develop. Our job is to make sure that this technology is accessible to everyone, so that we all may grow and develop together. In order to make technology accessible, we must make sure that companies are providing our communities with affordable prices. We can do this by supporting companies like LightSquared.

LightSquared plans on investing \$25 billion in building a wholesale 4G wireless network. As a wholesale provider, LightSquared will allow smaller phone companies to provide service to customers without the expense of having to create their own network. LightSquared's network will bring the cell phone industry competition and dramatically lower prices for all. LightSquared will help smaller companies to expand and provide more jobs for our community.

LightSquared's endeavors have been delayed due to interference issues, but with the collaborative effort of the Federal Communications Commission, LightSquared has shown that a majority of these issues have been resolved. Please support LightSquared and their efforts to expand wireless broadband coverage.

Kindest regards,

Deborah Baca
