

The NG 911 capabilities announced 8/10/11 have already been developed by Guardian Watch, an Augusta, Georgia, based company. Guardian Watch's iPhone app was released on iTunes in July and its Android app will be released next week. For the 911 centers to receive text, voice, pictures and live video, all they need is internet access.

Call me 706-877-4705 for details.
