Washington D.C. 20554

June 28, 2004

Via Facsimile and Certified Mail

Mr. Ronald Jakubowski
Chief Engineer, RF Systems
TX RX Systems, Inc.
8625 Industrial Parkway
Angola, NY 14006

Dear Mr. Jakubowski:

This letter is in response to your fax transmission of May 25, 2004 and attached letter dated March 17, 2004. The Spectrum Enforcement Division of the Enforcement Bureau has reviewed your complaint concerning the direct marketing of signal boosters and in-building radiation systems to commercial mobile radio subscribers and found no evidence of a violation. While it is correct that these devices may only be installed and operated by licensees, the Commission's Rules do not explicitly prohibit the sale of such devices to non-licensees. Accordingly, we find that further investigation is not warranted at this time.

Please direct any questions regarding this matter to Kathy Berthot, 202-418-7454.

Sincerely,

A handwritten signature in cursive script that reads "Joseph P. Casey".

Joseph P. Casey
Division Chief
Spectrum Enforcement Division
Enforcement Bureau

Jon Bacon
Marketing Manager
Wilson Electronics
3301 E. Deseret Drive
St. George, UT 84790

Dear Mr. Bacon:

Thank you for your recent entry in the **CTIA 2010 Emerging Technology (E-Tech)** awards program.

I am writing to inform you that we have determined that your entry, the Wilson Electronics Sleek™, is not eligible for participation in the CTIA 2010 E-Tech awards program because your submission appears to involve the marketing, sale or offer for sale of equipment intended to amplify commercial mobile radio service ("CMRS") device signals or extend the coverage area of CMRS providers, including any or all manner of amplifiers, repeaters, or boosters, to parties who may not be licensees or authorized by licensees to operate such equipment. Accordingly, CTIA will not accept this submission for entry in our awards program or display your entry at the E-Tech showcase at the International CTIA WIRELESS 2010 Show.¹

Thank you for your interest in this year's E-Tech awards program. We will contact you after the International CTIA WIRELESS 2010 event to process a refund of your entry fees. We look forward to working with you in the future on submissions of other types of solutions.

Regards,

A handwritten signature in black ink, appearing to read "Robert Mesriow".

Robert B. Mesriow
Vice President, Operations

¹ The CTIA E-Tech program submission requirements state that: "CTIA and the judges reserve the right to interpret all conditions regarding this competition without claim for damage or recourse of any kind. CTIA and the judges may make decisions on entry qualifications or category of submission as they see fit or disqualify an entry at their discretion."

February 25, 2011

Mr. Mark Evans
Marketing Manager
Wilson Electronics
3301 East Deseret Drive
St. George, UT 84790

Dear Mr. Evans:

Thank you for your participation as an exhibitor at the International CTIA WIRELESS® 2011 show ("Show"). This year's Exhibit Show Floor promises to showcase the best that the wireless industry has to offer!

I am writing because it has come to my attention that your company may be involved in the marketing, sale or offer for sale of "signal boosters" to parties who are not licensees or authorized by licensees to operate such equipment.¹ CTIA believes such marketing violates the Communications Act of 1934, as amended, and Sections 1.903 and 22.3(b) of the Federal Communications Commission ("FCC") rules, and the applicable precedents under these rules.

The Exhibit Standards included in CTIA's Rules and Regulations provide that: "Show Management shall have the right to prohibit any exhibit or part thereof, which in their opinion is not suitable to or in keeping with the character or purpose of the Exposition." While CTIA, as the Show Management, is looking forward to your participation at our show, any display of amplifiers, repeaters, boosters, distributed antenna systems, and in-building radiation systems ("signal boosters") that serve to amplify CMRS device signals, Part 90 device signals, or extend the coverage area of CMRS providers or Part 90 service licensees at the International CTIA WIRELESS® 2011 show will only be deemed suitable to or in keeping with the character or purpose of the show if they are displayed with a clear and conspicuous disclosure at your Exhibit Booth informing visitors that the sale and/or marketing of your company's signal boosters is limited to licensees, or those authorized by licensees to operate such equipment, as required by the FCC's rules.

To ensure that you have the appropriate disclosure on site, CTIA will provide signage for display in your booth, *i.e.*, "The sale and/or marketing of Wilson Electronics's signal boosters is limited to licensees, or those authorized by licensees to operate such equipment, as required by the FCC's rules." Please be advised that if you display signal boosters, the sign must be conspicuously displayed at all times in your booth while the Exhibit Floor is open.

Thank you for your cooperation.

Regards,

Robert B. Mesirov
Vice President, Operations

¹ The FCC, in a Public Notice, defines the term "signal booster" as "intended to include all manner of amplifiers, repeaters, boosters, distributed antenna systems, and in-building radiation systems that serve to amplify CMRS device signals, Part 90 device signals, or extend the coverage area of CMRS providers or Part 90 service licensees." *Wireless Telecommunications Bureau Seeks Comment on Petitions Regarding the Use of Signal Boosters and Other Signal Amplification Techniques Used With Wireless Services*, Public Notice, DA 10-14 at n. 1 (Jan. 6, 2010).

Date: Aug 11, 2011 3:27 PM

Subject: RE: FW: KAREN: Need your help

To: "Jonathan Bacon" <jbacon@wilsonelectronics.com>

Jonathan,

We appreciate your patience. As it stands, CTIA's position remains the same and therefore cannot offer Wilson Electronics the opportunity to take advantage of a CTIA sponsored email blast or any other sponsorship. We certainly do appreciate your participation at our conferences and look forward to seeing you at the CTIA Enterprise & Applications conference in October and CTIA Wireless 2012 in May of next year.

Kind Regards,

Geoff Dye
