Dear Commissioners:

I am writing you today to express my support for LightSquared's proposal to bring its unique and innovative wireless broadband network to Arkansas.

Access to wireless internet service is no longer a luxury in my industry, it is a necessity. As a financial advisor who travels Arkansas on a daily basis prospecting and servicing accounts, the lack of a wireless connection is no longer an option. Unfortunately, too often, I am burdened with a lack of high-speed connection, especially when traveling through rural Arkansas. It is imperative that these patches of our state gain access to competitive, reliable, and affordable 4G LTE if we wish to remain competitive with others around the world, and it is my firm belief that LightSquared's technology is a strong step in the right direction. It is my hope that you will fight on behalf of the many businessmen and women in Arkansas and support LightSquared's efforts to begin investment on their revolutionary new technologies.

Ultimately, we are in a race against time to deploy these services for the good people of our state. Along with the benefits rural communities would gain, I know LightSquared's services would be invaluable to our emergency service workers, hospitals, schools and colleges, small businesses, and families. Please make sure these technologies are able to reach those in which they would help the most, by supporting LightSquared's efforts to wholesale high-speed wireless broadband.

Please help Arkansas's business community by supporting LightSquared's efforts to bring innovative wireless broadband to our state.

Sincerely,

Adam Buerkle
